ROHRER'S Farm and Garden Seed

1939

**P. L. ROHRER & BRO.
SMOKETOWN-LANCASTER Co., PA.**

NOTICE TO PLANT CUSTOMERS

Previous years we handled the selling of Plants, grown by Glick's Plant Farms, through our catalog. This season Mr. Glick will issue a catalog and have charge of selling the Plants, etc., he has to offer. If you do not receive Plant Catalog write Glick's Plant Farms, Smoketown, Pa., and one will be mailed to you.

P. L. ROHRER & BRO.

All Seeds Sold on the Money Back Plan

If any seed you buy from us is not same quality as represented, it may be returned promptly and your money will be refunded, together with any freight charges you have paid.

BAGS ARE FREE and not weighed in with the seed. We make no extra charge for bags as most firms do. This will mean a saving to you.

FREIGHT WILL BE PREPAID on all orders of 300 pounds, or more (Except Seed Potatoes and Onion Sets), shipped at any one time to any freight station in Pennsylvania, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, West Virginia, Maryland, New Jersey and Ohio. All prices on Vegetable Plants and Garden Seeds are postpaid. We do not pay express charges.

EXPRESS SHIPMENTS amounting to 300 pounds, or more (Except Seed Potatoes and Onion Sets), are shipped "Charges Collect." Check will be mailed allowing you the actual freight charges we would have paid if shipped by freight.

PARCEL POST. When any Field Seeds are to be shipped by Parcel Post, add "extra" for postage. Prices on Field Seeds do not include postage.

PRICES. Latest price list of Farm Seeds is mailed with each catalog. If you are not ready to place your order when the catalog reaches you, write for the latest price list.

ORDER EARLY. It is important to order as soon after you get the catalog as convenient, then you will have your seeds on hand for planting when you want them.

TERMS OF PAYMENT. All orders must be accompanied by cash. **OUR GUARANTEE PROTECTS YOU.** Registered letters, Money Orders, Checks or Drafts preferred. Postage stamps often reach us in a worthless condition and are not desirable.

NON-WARRANTY. Every care is exercised to give all customers seed of good quality that will prove profitable and satisfactory yet the following clause is to be made plain. P. L. ROHRER & BRO. GIVES no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds or plants it sells and will not be responsible for the crop.

P. L. ROHRER & BRO., Smoketown, Lancaster Co., Pa.

PLANT ROHRER'S TESTED GARDEN SEEDS

ORDER YOUR SEED EARLY.

By ordering your seed early you will have all to gain and nothing to lose. You will not be disappointed by being sold out of varieties you prefer. You will save money. Prices usually work higher. You will have the seed on hand when you are ready to sow. You must be pleased with every purchase of seed you buy from this catalog. If you are not satisfied with the quality of seed you receive return it and we will refund your money promptly.

PRICES.

We pay postage on all garden seeds anywhere in the United States at the prices quoted in the catalog. Onion Sets on larger quantities than quarts are F. O. B. Smoketown. Freight or express collect. See price list.

ASPARAGUS

MARY WASHINGTON. This is a highly rust-resistant variety of Giant Asparagus. Makes rapid growth, is very tender, which makes it the best of all for market value. Mary Washington is without doubt the best sort known. Our strain cannot be surpassed. **Seed, by mail, postpaid, pkt., 10c; oz., 25c; ¼ lb., 60c; ½ lb., \$1.00; lb., \$1.75; 5 lbs., \$7.50.**

PALMETTO. An early prolific, regularly developed type of Asparagus, of the Southern Seaboard. First grown in South Carolina. Planted extensively. Large, thick, dark green shoots with distinctively pointed tips. One ounce seed will plant about 50 feet and produce about 200 plants. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 80c.**

BEANS

CULTURE. No crop responds more rapidly than Beans to good soil and cultivation. Beans are very sensitive to both cold and wet, and should not be planted before the ground is warm and dry. Keep them well hoed and cultivated, but only when ground is dry. Working when wet makes them more liable to rust and will injure the crop. The varieties we offer have been selected with great care, and we have every reason to believe that they will give perfect satisfaction. One pound will plant about 100 feet.

BOUNTIFUL. One of the first in bearing and yields for a long period. An especially good bean for the market or home garden. It is generally considered to be one of the best flat green podded bush beans. Pods are large, solid and stringless, retaining tenderness even when past maturity. Most popular early variety. **By mail, postpaid, pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75; 10 lbs., \$3.00.**

BURPEE'S STRINGLESS GREEN POD. This old variety is steadily growing in popularity, for it combines hardiness. The rich green pods are almost round, and mealy. Absolutely stringless, even after fully matured. It is tender and of delicious flavor, and should have a place in every garden. **By mail, postpaid, pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 65c; 5 lbs., \$1.50; 10 lbs., \$2.75.**

RED KIDNEY. A standard old variety that is very popular. It is grown almost exclusively for the dried beans, which are long, oval and purplish in color. The plant is dwarf. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35.**

Burpee's Stringless Green Pod

Be sure to order New Century Beet and Yellow Bountiful Beans. Both are very fine.

BEANS (Continued)

RED VALENTINE. An extra early variety that usually matures in 35 to 40 days; also fine for mid-summer growing to ripen in September. The vigorous bushes bear an abundance of medium length green pods which are fleshy, crisp and tender. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25.**

WHITE MARROW. A dwarf variety that is largely planted and used both as a string and shell bean. A profitable sort for market gardeners to grow, and a necessary one for the home garden. The dried beans are large and white, oval in shape. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25.**

WHITE NAVY. Also called Pea Bean. A good sort for either market or home use. It is smaller than the White Marrow, but is of fine flavor and is the variety used in making the famous "Boston Baked Beans." Very productive and is largely planted everywhere. Dry Beans small and pure white. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25; 10 lbs., \$2.00.**

YELLOW OR WAX PODDED VARIETIES

PENCIL POD or BLACK WAX. Pods round, meaty and stringless. A fine bean for the home garden and for home canning. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.**

IMPROVED GOLDEN WAX. Rust proof, a great improvement over the old Golden Wax. Pods 4 to 5 inches long, golden yellow, very fleshy, and one of the best beans to use either as a snap or shelled. Ready for picking 45 days from planting. Improved Golden Wax, in our judgment, is the best from every standpoint. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.**

ROUND POD KIDNEY WAX or BURPEE'S BRITTLE WAX. This is probably the earliest of Wax Beans. The pods are round, fleshy, brittle and stringless. In quality it is among the very best. It is extremely early and very productive, making it a favorite everywhere. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.**

ROHRER'S YELLOW POD BOUNTIFUL BEAN. The Yellow Pod Bountiful Bean is the earliest of all Yellow Beans and absolutely stringless. The pods are long, thick and very meaty. It is the best of all Yellow Beans. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.**

POLE OR CORNFIELD BEANS

SCOTIA or STRIPED CREASEBACK. This is one of the very best string Beans. Very tender and delicious. It is a Pole Bean and should have some support. Can very easily be planted in corn. Pods are long, perfectly round, entirely stringless and of the highest quality. They have a rich melting flavor possessed by no other Bean. They commence to bear as soon as the early Bush Beans are gone. Be sure to include some of this variety with your order. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 45c; 2 lbs., 60c; 5 lbs., \$1.40.**

GOLDEN CLUSTER WAX. An extra strong grower and very productive. The flat stringless pods are large, 7 to 8 inches long, and three-fourths inch wide, and are borne in clusters. They are rich golden yellow of excellent flavor, and remain fit for use for a long time. Vines bear continuously. One of the best yellow podded Pole Beans. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50.**

KENTUCKY WONDER. The most popular and generally grown of all Pole Beans. A continuous bearer and almost rust proof. The long pods are stringless, crisp and tender. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35.**

LAZY WIFE. The best late green podded Pole Bean. It is an extremely heavy yielder of broad, thick, fleshy, dark green pods, which are entirely stringless, and average 6 inches in length. The dry beans are excellent for winter use. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.40; 10 lbs., \$2.25.**

BUSH LIMA BEANS

Fordhook Bush Lima

LIMA BEANS

BURPEE'S BUSH LIMA. A good standard variety that grows about 18 inches high. Pods average six inches long and $1\frac{1}{4}$ inches wide. Pods are borne in clusters of five to eight. The pods are well filled with very large beans, identical in size and luscious in flavor as the large white Pole Lima. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.**

FORDHOOK LIMA. The bush is of erect growth, holding the pods off the ground, so that they are not injured by wind and rain. Very prolific. Pods contain four or five large flat Beans and are very easily shelled. The green Beans, when full size, are tender, juicy and sweet. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 45c; 2 lbs., 85c; 5 lbs., \$2.00; 10 lbs., \$3.75; 100 lbs., \$32.00.**

POLE LIMA BEANS

POLE LIMA—KING OF THE GARDEN. A vigorous grower, producing an abundance of large dark green pods which frequently contain five or six large Beans. These Beans are excellent in quality. The best of all Pole Limas. Dry beans are large and flat. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.**

IMPROVED CHALLENGER. Also known as Potato Lima. Very early and produces large clusters until frost. Beans are thick, fleshy, cook mealy, and very delicious. Beans about same shape and size as Fordhook. Shells out more beans than any other pole lima. Cannot be excelled for home and market garden. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.**

BEETS

ROHRER'S NEW CENTURY BEET. If you want a beet that will stay tender and sweet all summer and winter, plant the New Century Beet. It is the best table beet we have ever eaten. It makes no difference what size they are, they are tender just the same. The color of the beet is very deep red and the tops are green. **By mail, postpaid, pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 60c; $\frac{1}{2}$ lb., \$1.10; lb., \$2.00.**

Detroit Dark Red

CROSBY'S EGYPTIAN. An extra quick grower. Suitable for forcing or growing outdoors. Smooth turnip shaped. Roots averaging two inches in diameter. Beets are tender and of good flavor. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.**

DETROIT DARK RED. An ideal beet for home and market garden. The roots are globe shaped, dark red and uniformly smooth. When young the flesh is almost black-red, turning to dark crimson. They are appetizing dark red when cooked and are very sweet. Every garden should contain some of these delicious beets. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.**

EARLY BLOOD TURNIP. A fine early sort which is good for summer and autumn use. The dark red roots are very sweet and tender, with a fine flavor. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.**

STOCK BEETS or MANGELS

A splendid winter feed for cattle and hogs. Increases the flow of milk. Yields larger crops than turnips and are higher in feeding value. Also valuable as a poultry food.

MAMMOTH LONG RED. This is a particularly good variety, having long roots, 5 to 6 inches in diameter. The skin is bright red and the flesh white with veined rings of rose pink. Enormously productive. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 65c; 5 lbs., \$2.75; 10 lbs., \$5.00.**

GOLDEN TANKARD. A heavy cropper on good land and easily harvested. The large sweet yellow roots are much relished by stock. One of the best of the Mangels. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 65c; 5 lbs., \$2.75; 10 lbs., \$5.00.**

CABBAGE

COPENHAGEN MARKET. The earliest round head Cabbage we know of. As early as Wakefield and has larger heads. Heads are uniform, practically every plant making a good firm head. It is a vigorous grower and excellent keeper. Stands longer in field without bursting. **By mail, postpaid, pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.10; lb., \$4.00.**

EARLY JERSEY WAKEFIELD. Wakefield cabbage is grown in nearly every garden and among the market growers it is planted almost entirely for first early. Pointed heads of good size, very uniform and compact. **By mail, postpaid, pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., 80c; lb., \$2.75.**

GOLDEN ACRE CABBAGE. The Earliest Heading Cabbage in cultivation. Heads are solid, good size, delicious flavor, tenderness and productivity. Very hardy permitting earliest planting. We recommend Golden Acre Cabbage to the Market Gardener and private planter. **By mail, postpaid, pkt., 10c; oz., 60c; $\frac{1}{4}$ lb., \$1.75; lb., \$5.00.**

ALL SEASON. Very desirable for either early spring, summer, or fall use. The heads are very large, flat and of fine quality. Grows well under varying conditions. **By mail, postpaid, pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., 80c; lb., \$2.50.**

Late Flat Dutch

25c Will buy any three 10c packets, or any two 15c packets of either flower or vegetable seeds listed in this book.

SUCCESSION. Especially recommended for its uniform size, shape and reliability for heading. Makes a deep, flat head, solid and uniform in color. Its tenderness is unsurpassed. Can be grown for fall or winter use. **By mail, postpaid, pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., 90c; lb., \$2.75.**

DANISH BALLHEAD (Short Stem). This is the most popular Winter Cabbage known. The heads are nearly round, very solid, well flavored and firm grained making it the best variety for winter use. Its numerous good qualities has caused it to be more largely planted than any other variety. **By mail, postpaid, pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., 90c; lb., \$3.00.**

GLORY OF ENKHUIZEN. The round ball-like heads are produced as early as All Season. Heads are of medium size, weighing 6 to 8 pounds when trimmed. Very solid, with few outer leaves, permitting close planting. A good winter keeper. Very tender and fine flavored. **By mail, postpaid, pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.00.**

LATE FLAT DUTCH. One of the best known cabbages and one of the most reliable. It produces immense heads of excellent quality which keeps well all winter. **By mail, postpaid, pkt., 5c; oz., 25c; $\frac{1}{4}$ lb., 80c; lb., \$2.50.**

AMERICAN SAVOY. The best all around Savoy Cabbage. Heads are large in size and extremely solid. **By mail, postpaid, pkt., 5c; oz., 25c; $\frac{1}{4}$ lb., 80c; lb., \$2.25.**

Danvers Half Long

CARROTS

DANVERS HALF LONG. One of the most productive and is adapted to all soils. The roots grow from seven to eight inches long. This variety is valuable for stock feeding as well as for market. Very heavy yielder. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 80c.**

CHANTENAY. The most popular Carrot for table and market. The roots average five inches in length. The flesh is tender, fine grained, free from hard core, and deep orange in color. A very choice early variety. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 80c.**

SEMESAN. A Seed Disinfectant. Place a small quantity of Semesan with the seeds in a jar and shake vigorously for a few minutes. Bacteria and fungus spores that may be adhering to the seeds will be killed. See page 28.

Snowball Cauliflower

CAULIFLOWER

CULTURE. For earliest Cauliflower plant seed in greenhouse or boxes in the house in February. Transplant in cold frames or flats, two to three inches apart. Set in open ground as soon as land can be prepared. For late Cauliflower plant in open ground like cabbage.

SNOWBALL. There is no better Cauliflower than the Snowball variety, and our strain is as fine as can be had at any price. The seed we offer is our own, direct importation from most noted grower in Holland. It is the best the world affords, and quality considered our prices are very reasonable. It is not the earliest to be had, but a remarkably sure header, making large, solid, perfect, pure white heads of the finest quality. We recommend it also for late summer and fall planting. **By mail, postpaid, pkt., 25c; $\frac{1}{4}$ oz., 50c; $\frac{1}{2}$ oz., \$1.00; oz., \$1.75; $\frac{1}{4}$ lb., \$6.00; lb., \$20.00.**

ENDIVE

BROAD LEAVED BATAVIA. A heavy cropper that is very hardy. Excellent salads can be made from the broad thick leaves when blanched. **By mail, postpaid, pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 35c; lb., \$1.25.**

MOSS CURLED. The leaves of this variety are very finely divided and curled, forming a very attractive plant. It is very tender, of excellent quality, and will in time supplant the other varieties. **By mail, postpaid, pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 35c; lb., \$1.25.**

SEMESAN JR. FOR BEANS

We have found that it pays to treat Beans with Semesan Jr. before planting. In cold, unfavorable weather treated beans have twice the chance of growing that untreated beans have. We also find much less anthracnose injury on beans which have been treated. See page 28.

Mt. Airy, Md., April 1st, 1929.

I have been using your seeds and Plants for about 10 years. Last year I thought I would try the New Century Beet. I found it to be the best beet I ever used, so tender and fine for canning.

Ida Runkles. □

CELERY

GOLDEN SELF BLANCHING. A very good self blanching celery. It is a vigorous compact grower with straight, rich, golden yellow stalks of excellent quality, being remarkably crisp, tender and free from stringiness. Our American seed is of the highest quality and is of the best that can be obtained. **By mail, postpaid, pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.50.**

BURPEE'S FORDHOOK. The largest, most solid and finest nut flavored Celery in existence. Introduced by Burpee in 1915. The quality became known to celery growers a few years after introduction. Grows compact and is easily blanched. It is unsurpassed in every respect, and commands a higher price than any other variety. **By mail, postpaid, pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.**

EASY BLANCHING CELERY. Slightly taller than Golden Self Blanching, and about two weeks later. A favorite variety with market gardeners. Very crisp and thick. **By mail, postpaid, pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.50.**

GIANT PASCAL. One of the finest of the fall and winter sorts. The stalks are very thick, large, solid and crisp, with a delicious nutty flavor free from bitterness. **By mail, postpaid, pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 75c; lb., \$2.50.**

WINTER QUEEN. One of the best of the dwarf winter varieties. It resembles Golden Self Blanching, but has a rich green color similar to the Giant Pascal. Grows quickly and is ready for market much earlier in fall than other sorts. **By mail, postpaid, pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 75c; lb., \$2.50.**

HOUSER CELERY. One of the best varieties for home use or for market, with its sweet, luscious, rich, nutty flavor. When bleached it becomes a beautiful creamy white, full of hearts and every stem of it to the outside is delicious. A good winter keeper. **Price postpaid, pkt., 10c; oz., 50c; $\frac{1}{4}$ lb., \$1.50.**

Burpee's Fordhook

CUCUMBER

DAVIS PERFECT. A very vigorous grower, producing an abundance of fine textured, excellent flavored fruits, seven to nine inches long and seven inches in circumference in the middle. The spine is dark rich green and the flesh is fine for slicing. The fruits are very handsome and regular in shape. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.20.**

Improved White Spine

EVERBEARING. Extremely prolific. Continues to bear throughout the season, and cannot be excelled for large yield. Fruits are dark green, thick in flesh, crisp and tender, average 6 to 7 inches in length. Popular with Market Gardeners. Excellent for pickling and slicing. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.20.**

EARLY GREEN CLUSTER. A splendid fruited variety that makes excellent pickles. The vines are very prolific, frequently bearing the fruit in clusters of two and three. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.20.**

IMPROVED LONG GREEN. One of the best pickling sorts. The vines are very productive of uniform dark green fruits, which are tender, crisp, and of fine flavor. A great favorite with the market gardener. Very heavy yielder. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.20.**

IMPROVED WHITE SPINE. A very good table variety, because of its light green color, which it retains a long time after being pickled. The fruits are nearly cylindrical in form, slightly pointed at the ends. Light green with white spines, very smooth. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.20.**

ROHRER'S NEW PERFECTION CUCUMBER. A Great Forcer for Greenhouse or out doors. An ideal sort for market gardeners and shippers. The deep green color is the crowning merit of this sort. These beautiful dark green fruits sell quickly on all markets. It is a heavy yielder and a profitable variety to grow. **By mail, postpaid, pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50.**

CHICAGO PICKLING. Very prolific and profitable sort for pickles. Very uniform, productive, and excellent for pickling. Fruit straight, square ended, and is medium deep green color. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.20.**

Sheps Plant Spray is an Insecticide and Fungicide —Kills Insects yet is Harmless to both Animals and Plants.

Stowell's Evergreen

SWEET CORN

GOLDEN BANTAM. The earliest and sweetest yellow grained sugar corn. Ears are about 5 inches long. The delicious flavor and tender quality when cooked is not surpassed by any other variety of Sweet Corn, and is fast making it one of the most popular for home and market garden. The stalks are dwarf, attaining a height of about four feet. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10; 10 lbs., \$1.75; 25 lbs., \$4.00.

BANTAM OR GOLDEN EVERGREEN. About 82 days from planting to edible condition. A second early, one of the latest introductions to the sugar corn family. Stalks $7\frac{1}{2}$ to 8 feet high. Ears thick, about 8 inches long. Grains golden yellow, exceedingly sweet. Very productive. Pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 50c.; 5 lbs., \$1.15; 10 lbs., \$2.00. Postpaid.

HOWLING MOB. Medium early. One of the best flavored and most tender of the medium early varieties. Ears measure seven to nine inches in length, with twelve to fourteen rows of large white pearly grains. The stalks usually produce two ears. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.15; 10 lbs., \$2.00; 25 lbs., \$4.25.

BURBANK BANTAM. Grows 4 $\frac{1}{2}$ to 5 feet high. Ears 7 to 8 inches long, and has 12 to 16 rows to the cob. Has the original Golden Bantam Flavor and matures for table use in about 65 days after planting, and excels any other one of the Bantam Corns that we know of. Pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c.; 5 lbs., \$1.50. Postpaid.

EGG PLANT

CULTURE. Should be sown in a hotbed in February or March and the plants thinned out two to three inches apart when they have reached a height of about two inches. Set out in rich soil when the weather is warm and settled two feet apart each way.

BLACK BEAUTY. While the fruit is as large as the New York Improved it matures earlier, and is of a deeper and richer color. The plants are of robust growth and are very prolific. Being nearly two weeks earlier than any other variety, much larger crops are produced before the frost in the North. By mail, postpaid, pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.30; lb., \$4.25.

BARDENS WONDER BANTAM SWEET CORN. A new variety of the same type, season, and quality as Golden Bantam, but having a longer ear. The stalks grow from 5 to 6 feet high and have ears 8 to 10 inches long, filled with 8 rows of rich golden kernels. It will appeal to the critical market or home gardener who has been looking for a Bantam corn that will produce more to the acre and yet have golden bantam quality. Pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c.; 2 lbs., 50c.; 5 lbs., \$1.25; 10 lbs., \$2.00.

EARLY EVERGREEN. Resembles Stowell's Evergreen in flavor, appearance and quality, but ripens ten days earlier, and remains in good condition as long as that variety. Ears measure about seven inches in length. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.15; 10 lbs., \$1.90; 25 lbs., \$4.00.

STOWELL'S EVERGREEN. Midseason. More largely planted than any other Sweet Corn for home use, market and canning. The long slender grains are good sized and free from glaze and flintiness. The ears are large and freely produced. It is an exceptionally good canner and remains in good condition for cooking a long time. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10; 10 lbs., \$1.90; 25 lbs., \$4.25.

COUNTRY GENTLEMAN or SHOE PEG. Late variety. The ears are seven to nine inches long and the cob is small, densely covered to the very tip with irregular rows of very long, tender white kernels of delicious flavor when cooked. Stalks average seven feet in height and frequently yield 3 ears each. Claimed by many to be the best flavored Sweet Corn. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10; 10 lbs., \$2.00.

POP CORN

WHITE RICE. A very popular and prolific variety. Ears long, and produced abundantly. Kernels long and slender, resembling rice grains. Pops pure white, and used largely for commercial purposes. Tender and delicious when popped. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00.

Iceberg

NEW YORK or WONDERFUL—60 Days. White Seed. Possibly the most sought after Lettuce in the market today, certainly the most talked about, is the crisp, hard Lettuce which is served so extensively on dining cars and in hotels and restaurants. It is a crisp, large heading variety, dark metallic green and slightly curled on the edges, produces the most solid or compact head of any Lettuce in the market. By mail, postpaid, pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 75c; lb., \$2.25.

MUSKMELONS

CULTURE. One ounce seed will sow about 80 hills. The Muskmelon demands a light sandy soil, and planting should not be done until ground is dry and warm. Sow 6 to 12 seeds on a hill, the hills to be 6 feet apart each way and covered one-half inch. When the plants have produced their rough leaves thin to three plants to hill.

EMERALD GEM. Considered by many to be one of the best salmon-fleshed melons. It is a small variety, with dark green skin and flesh that is sweet and delicious. The vines yield heavily, and the fruit always sells well on the markets. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.35.

EXTRA EARLY HACKENSACK. A good variety where an early crop is desired, and has so many good qualities that it has become immensely popular. The melons are large, flat and well netted, and the flesh is thick green of excellent flavor. A good seller on the markets. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; lb., \$1.25.

ROCKY FORD. The melons are oval in shape and heavily netted, measuring about 5 inches in length. The smooth, light green flesh is delicious in flavor. A very good sort that has been on the market a long time but is still very popular with lovers of good melons. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; lb., \$1.25.

LETTUCE

ICEBERG—50 Days. White Seed. A curled heading, medium large, crisp green variety, edges fringed and tinged with brown, a sort having outer leaves of strong ribs, enclosing an exceeding crisp and white interior—crisp as ice. By mail, postpaid, pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.

BIG BOSTON. The most popular of head Lettuce, as it is good for early, midseason and fall use. The large compact heads are bright, light green, blanching to rich yellow at the heart and are deliciously sweet, tender and crisp. It is an exceptionally good variety for market as the heads are very solid with few outer leaves. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

BLACK SEEDED SIMPSON. The broad light green leaves, crumpled and twisted, form a large firm bunch, which blanches well and is decidedly crisp. One of the best bunching varieties and marketable early in the season. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

GRAND RAPIDS. Fine variety for forcing under glass, but also good for outdoor planting. The crisp light green leaves form a loose, rounded cluster that matures early. A very good market sort as it ships well, retaining its crisp qualities much longer than any other variety. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

Extra Early Hackensack

TIP TOP. One of the most popular and productive melons, and good for extra early and late crops. The fruit is large, nearly round and moderately netted. The flesh is solid, sweet, juicy, of fine flavor and can be eaten to the very rind. One of the best all around melons. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; lb., \$1.25.

WATERMELONS

CULTURE. Ounce will sow about 50 hills. Watermelons should have same cultivation as Muskmelons, but should be planted 8 to 10 feet apart.

COLE'S EARLY. An extra early variety that has a thin rind, beautiful bright red flesh, of fine texture and lusciously sweet. Melons are oval and of medium size. One of the best sorts for the home market. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 85c.**

Keckley's Sweet

KECKLEY'S SWEET. One of the best melons for home use. The rind is usually thin, and the beautiful bright scarlet flesh ripens close to it. It is oblong in form and has glossy, dark green skin. The flesh is crispy and sugary without a sign of stringiness. The melons average 18 inches in length by 10 to 12 inches in diameter. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 85c.**

ONIONS

PRIZE TAKER. An enormous yellow Onion that is three times the size of the Yellow Globe Danvers, and sometimes weighs four pounds. The skin is thin and bright straw-yellow, giving the bulbs a very handsome appearance. The pure white flesh is crisp, very sweet and mild in flavor. On account of its large size it matures about a month later than the Globe Danvers. There is no more profitable sort for home or market garden. **By mail, postpaid, pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 75c; lb., \$2.50.**

Prize Taker

WHITE PORTUGAL or SILVERSKIN. The bulbs are large with silvery skin, and sweet, tender, white flesh, which is mild in flavor. Our strain of this variety cannot be excelled. **By mail, postpaid, pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 75c; lb., \$2.75.**

ROUND LIGHT ICING. Fruits are medium sized, nearly round, greenish white, slightly veined or dotted with light green. The flesh is light red, sweet and crisp, seed white. Noted for its fine qualities and makes melons sell well on any market. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 85c.**

TOM WATSON. One of the best shipping melons. The fruits measure 18 to 24 inches long and 10 to 14 inches in diameter, weighing as high as 50 pounds. The delicious deep red flesh extends close to the rind, which is dark green and very strong. A comparatively new variety that has already won for itself a reputation as a

shipping melon. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 85c.**

LONG LIGHT ICING. A long melon with skin very light green and sometimes reaches a weight of 40 to 50 pounds. The flesh is deep red and very fine grained. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 85c.**

ONION SETS

YELLOW GLOBE DANVERS. White Portugal or Silver Skin. You need take no chances on ordering our High Grade Onion Sets. These sets are sure to please you and produce profitable results. **By mail, postpaid, qt., 25c.** For prices on larger quantities see price list.

YELLOW GLOBE DANVERS. The most popular of the yellow Onions for market and home use, as it is one of the heaviest croppers and best keeper. The bulbs are very large, globe shaped, with small necks and a brownish yellow skin. The flesh is white, fine grained and mild. It is an enormous yielder, a crop of 500 to 800 bushels to the acre not being unusual. **By mail, postpaid, pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 75c; lb., \$2.50.**

WHITE PEARL. The best of all for small pickles and the earliest ripening onion. Bulbs are pure white, averaging 1½ inches in diameter. **By mail, postpaid, pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 75c; lb., \$2.50.**

Peter Pan

PEAS

LAXTONIAN. A large podded dwarf variety similar to Gradus, though more dwarf and a little earlier. The extra large, deep green pods are always well filled. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.40; 10 lbs., \$2.50.**

THOMAS LAXTON (Wrinkled). About four days later than Gradus and identical in growth, but the peas are deeper, richer green, and are square at the end. Thought by many to be sweeter and finer in flavor than Gradus. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35; 10 lbs., \$2.25; 50 lbs., or more, 19c per lb.**

NOTT'S EXCELSIOR (Wrinkled). One of the most popular of the extra early varieties, especially with market gardeners. It is a close, compact grower with 3 inch pods tightly filled to the very end with large peas of exceptionally sweet flavor. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35; 10 lbs., \$2.25; 50 lbs., or more, 20c per lb.**

TELEPHONE. One of the most productive of the late wrinkled sorts. Vines very vigorous in growth, reaching a height of $3\frac{1}{2}$ feet. Pods are very large in size and contain 6 to 7 peas, closely packed, of pale green color and delicious flavor. Fine variety for general crop. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.50; 50 lbs., or more, 20c per lb.**

EARLY BIRD PEAS. A very hardy, productive, early, large podded variety which can be planted very early in the Spring. Pods are about four inches long and contain seven to nine peas of good quality. Peas are almost smooth and will withstand the cold wet weather. A superior quality for an early large podded peas. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.40.**

PEAS

ALASKA. An extremely early, smooth, blue seeded variety that is very productive. The vines grow 20 to 24 inches high, bearing well filled, medium sized pods. Matures in about 55 days and can be planted 10 days before it is safe to put the tender wrinkled sorts in the ground. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.10; 10 lbs., \$2.10; 50 lbs., or more, 19c per lb.**

FIRST AND BEST. A very early sort that is extremely popular for market and shipping. The pods are well filled with smooth peas, and usually mature at one time, so that the entire crop can be gathered in one picking. A good early variety. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.10; 10 lbs., \$2.00; 50 lbs., or more, 18c per lb.**

GRADUS or PROSPERITY. One of the best wrinkled sorts. Vines are vigorous and produce uniformly large pods 4 to $4\frac{1}{2}$ inches long, nearly round and filled with large peas of delicious flavor. Matures in 55 days. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35; 10 lbs., \$2.50.**

PETER PAN. Very large podded dwarf pea. Vines short and yield abundantly. Peas dark green, and are of highest quality. Very profitable sort for either home or market garden. It will pay you to plant at least a portion of your crop with this variety. A trial will convince you. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.40; 10 lbs., \$2.50.**

LITTLE MARVEL (Wrinkled). Vines grow about 15 inches high producing pods $2\frac{3}{4}$ to 3 inches in length. Matures in about 60 days. This variety resembles Nott's Excelsior in vines, habit, growth and quality, however, the pods are considerably larger, often produced in pairs. The seed is green and of medium size. Highly recommended variety for home garden. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35; 10 lbs., \$2.40; 50 lbs., or more, 20c per lb.**

PRINCE EDWARD PEAS. Matures in about 80 days. Vines $4\frac{1}{2}$ to $5\frac{1}{2}$ feet tall. Large pods, 5 to $5\frac{1}{2}$ inches long, containing 5 to 7 peas of the best dark podded telephone type, showy, exceedingly productive and in our opinion the best strain of Telephone on the market today for either home or market gardeners to grow. **Pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35; 10 lbs., \$2.50.**

PARSNIPS

A standard variety. Roots are of medium length, with a broad shoulder which gradually tapers downward. The skin is white, smooth and attractive. The flesh is sweet, fine, grained and tender. Good for table use or stock feeding. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.**

Hollow Crown Parsnip

SUGAR PEAS

MAMMOTH MELTING SUGAR. The largest, sweetest and most desirable of the Sugar Peas. Pods of this variety are so brittle that they snap without a string. Plants grow to a height of 5 feet and bear a profusion of large, broad pods. One of the best Sugar Peas. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 45c; 2 lbs., 75c; 5 lbs., \$1.75; 10 lbs., \$3.00.**

TALL LUSCIOUS SUGAR. This variety is unequalled for sweetness and tenderness. Pods are thick and fleshy at all stages of growth, and are 5 to 7 inches long, and 1 to 1 $\frac{1}{2}$ inches wide. This variety grows 5 to 6 feet tall and branches freely if given proper support, producing abundantly for a long period. Blossoms are purple. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75; 10 lbs., \$3.00.**

DWARF SUGAR. Dwarf in habit of growth. Matures in 60 days. Small sized pods which are very tender, sweet and delicious. Blossoms white. **By mail, postpaid, pkt., 10c; $\frac{1}{2}$ lb., 25c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75; 10 lbs., \$3.00.**

PEPPERS

CHINESE GIANT. An enormous Pepper measuring 12 inches in circumference and four to five inches long. It is an early and prolific sort. Plants grow about two feet high and carry an enormous load of fruit, often having appearance of being bunched together. Flesh is thick, tender, mild and sweet. **By mail, postpaid, pkt., 10c; oz., 60c; $\frac{1}{4}$ lb., \$1.75; lb., \$6.00.**

Chinese Giant

RUBY KING. A wonderfully productive Pepper bearing fruit 4 to 6 inches long and 3 to 4 inches across at top, slightly tapering toward end. The flesh is so mild and sweet that it is used sliced in mixed salads. Its large size and thick flesh make it particularly fine for stuffing with meats, rice, etc. Color bright red. **By mail, postpaid, pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.10; lb., \$3.75.**

HARRIS GIANT. A splendid new home Garden Pepper of a very large size and sweet thick flesh. Plants are very heavy bearers. This is a fine pepper for your garden. Matures early. **By mail, postpaid, pkt., 10c; oz., 60c; $\frac{1}{4}$ lb., \$1.75.**

For only 20 or 30c per acre you can insure your stand of Clover, Alfalfa Sweet Clover, Soy Beans, etc. You cannot afford to take chances when the cost is so little. Include Stimugerm in your order without fail. See page 29.

RADISHES (Round Variety)

EARLY SCARLET TURNIP. No Radish is more popular for the home garden. A quick growing, round, red radish with a small top. Rich red color, crisp and tender. Fine for early outdoor variety. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 90c.**

SCARLET GLOBE. One of the earliest radishes and one of the best for forcing. Very small top. Bright red in color, very attractive, both in color and shape. Mild, crisp, juicy and tender. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 90c.**

SCARLET TURNIP, WHITE TIPPED. Very popular market sort because of its attractive appearance. The Radishes are very deep scarlet in color with white tip. Flesh white and of fine quality. A great favorite for early planting outdoors. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 90c.**

French Breakfast

FRENCH BREAKFAST. The ideal olive shaped radish. The color is bright red, tipped with white. It is oblong in shape, and the quality is crisp and tender. It is a quick grower. Matures in 20 days. Exceedingly popular. **Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 90c postpaid.**

CHARTIER LONG SCARLET. A beautiful long Radish of a deep crimson, shading to white at tip. Splendid for outdoor culture. Will keep tender longer than most varieties. The flesh is white, crisp and well flavored. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 90c.**

LONG WHITE VIENNA or LADY FINGER. Grows 6 to 7 inches in length and is very attractive. The skin and flesh are snow white, crisp and juicy. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 90c.**

PARSLEY

MOSS CURLED. The best and most improved strain. It is beautifully curled and crumpled, and is the best for garnishing and flavoring. If cut when about three inches high it starts a new growth that will be better curled and a brighter color. Makes an ornamental plant for edging walks. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 85c.**

Icicle

ICICLE. The finest early, pure white, long radish. On good soil they are ready in 20 to 25 days, and will remain crisp and tender longer than any first early variety. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 90c.**

WHITE STRASBURG. An excellent summer Radish which stands severe heat and grows quickly. Handsome, long, tapering, skin and flesh pure white, firm, crisp and tender. Can be pulled five weeks after sowing, but may be allowed to grow, retaining its crispness even when the roots are old and large. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 90c.**

RADISHES (Winter)

WHITE CHINESE. This variety grows enormous in size. Roots are cylindrical and grow 12 to 15 inches long with a diameter of 4 to 5 inches. The flesh is crisp, juicy and tender. Agreeably mild in flavor these roots are easily stored in boxes packed in sand and will keep all winter. If placed in cold water one hour before using it will add materially to their freshness. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 90c.**

CHINESE ROSE or SCARLET CHINA. Of medium size, 4 to 5 inches long. Skin deep rose. Flesh white, firm and compact. Even though the flesh is firm it is not at all hard or stringy. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 90c.**

ROUND BLACK SPANISH. Roots are round, skin is black and the flesh pure white. Easily grown and heavy yielder. The flesh is extremely firm and the roots keep in perfect condition all winter long if stored in slightly damp sand or soil and placed in a cool but frost proof cellar. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 90c.**

SALSIFY

MAMMOTH SANDWICH ISLAND. A tender, delicious variety that is far superior to other sorts. The roots are larger, thicker and grayer, and the leaves are larger and greener. Very mild and delicately flavored. This variety is planted very largely by market gardeners and should find a place in every home garden. **By mail, postpaid, pkt., 5c; oz., 25c; 1/4 lb., 75c; lb., \$2.25.**

SPINACH

BLOOMSDALE (Savoy Leaved). This variety has wrinkled leaves. It is the hardiest variety and very prolific. The thick fleshy leaves are crumpled and very delicious. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 50c; 10 lbs., \$4.00.**

KING OF DENMARK SPINACH. A new variety that is far superior to all other varieties. It will stand from ten days to two weeks longer before running to seed than any other variety. This is a great advantage over the other varieties for both the home garden and the commercial grower. Large thick dark green leaves. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 60c.**

SHEPS PLANT SPRAY (NON-POISONOUS)

Get rid of destructive insects. Use SHEPS Plant Spray. Kills and controls both sucking and chewing insects but absolutely harmless to humans, birds, animals and pets. Will not "burn" delicate leaves or flowers. Makes green, healthy, lustrous foliage. No soap sud solution needed—simply mix with water.

SWISS CHARD

GIANT LUCULLUS. Stalks grow tall with broad, thick, fleshy, crumpled leaves, which are delicious. A fine vegetable that requires little attention and will furnish crop from July until frost. Very tasty when cooked in same manner as Spinach. **By mail, postpaid, pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 90c.**

KOHL-RABI

WHITE VIENNA. Short leaved. Bulb light green. Very rapid in growth. **Pkt., 10c; oz., 25c; 1/4 lb., 75c; lb., \$2.50, postpaid.**

NEW CENTURY BEET

Very dark red, is sweet and tender, no matter what size they are when you dig them, and just as sweet and tender in the spring as they are when you dig them. Absolutely the best beet that grows. See page 3.

PUMPKINS

KING OF THE MAMMOTH. The popular exhibition Pumpkin that is usually the winner at the fairs. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.10.**

SUGAR or PIE. One of the best pie Pumpkins. An excellent keeper. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.**

CUSHAW or CROOKNECK. Yellow. One of the widely popular varieties. Matures in 75 days. Flesh yellow, solid and sweet. **Packet, 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.20 postpaid.**

GREENSTRIPED CUSHAW. Flesh rich yellow. Solid and fine grained, very thick and sweet. Excellent for pies. Good keepers. **Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.20 postpaid.**

SQUASH (Summer Varieties)

EARLY WHITE SCALLOPED (*Pettypan*). A good shipping sort, which matures early. The flat scalloped fruits are creamy white in color, uniformly large and of good quality. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.**

SUMMER CROOKED NECK. An early variety with extra large fruits, often measuring 18 inches to 2 feet long. The flesh is of good quality and rich yellow in color. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.**

SQUASH (Fall and Winter Varieties)

GOLDEN HUBBARD. Fine for home garden, being one-third to one-half smaller than the True Hubbard. The flesh is deep golden yellow, of fine flavor and cooks dry. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.**

TRUE HUBBARD. A fine keeper and popular as a home and garden variety. The fruits are large, oval shaped, with dark green skin and very rich in flavor. An old standard sort that is planted extensively. **By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.**

GERMACO HOTKAP

Growers of Vine crops have found that it pays to use HOT-KAPS. They protect the plants from frost, beating winds, striped Beetles and other insects. Full description and prices, see page 31.

TURNIPS

PURPLE TOP GLOBE. An excellent keeper and fine to grow for stock as well as for table use. The Turnips measure 6 inches and more in diameter and are of perfect globe form. They are clear creamy white below the rich purplish red above. The flesh is white and firm, crisp, and of mild flavor. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 60c.**

Purple Top Globe

COWHORN. Long white, mainly used for stock feeding, but is of excellent quality for table use. It is a rapid grower and is fine for turning under with Crimson Clover as a green manure crop. The roots are large, long, carrot like shape, and grow partly above the ground. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 50c.**

RUTA BAGA

AMERICAN PURPLE TOP. Grows very large in size but remains solid and is fine grained. Roots are purple at top and oblong in shape with short tap root. The flesh is deep yellow, mild and sweet. Fine for table use or stock feeding. This is a very large yielder and good keeper. **By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.**

For the Quickest and Easiest way to kill destructive insects get Sheps Plant Spray. Positive Control. Non-poisonous. See page 30.

Deposit, N. Y., June 10, 1929.
All the last order came fine.

Mrs. Floyd J. Daire.

Champlain, N. Y., June 6, 1929.
Many thanks for prompt shipment of my small order.

A. S. Anderson.

Pittsburgh, Pa., May 10th, 1929.
Have had good success with your Salvia last year.
Martha J. Morrison.

EARLIANA. A real early Tomato, one that will make fruits of good size, solid and good quality. The flesh is solid and has few seeds. **By mail, postpaid, pkt., 5c; oz., 30c; 1/4 lb., \$1.00; lb., \$3.50.**

CHALKS EARLY JEWEL. Bright scarlet, extra early in maturing, coming in very shortly after Earliana, but is a heavier cropper, with fruits of larger size and sweeter flavor. **By mail, postpaid, pkt., 5c; oz., 30c; 1/4 lb., \$1.00; lb., \$3.50.**

MAR-GLOBE. A splendid new variety developed by the U. S. Dept. of Agriculture. Produces large smooth globe shaped, deep scarlet, fruit that ripens evenly and does not crock. The flesh is very fine quality. Very productive. **By mail, postpaid, pkt., 10c; oz., 75c; 1/4 lb., \$2.00; lb., \$6.50.**

JOHN BAER. The introducer claims that this is one of the very earliest Tomatoes. In addition to its earliness it is an enormous yielder. The fruits are perfect in shape, solid, high crowned and of a brilliant red. **By mail, postpaid, pkt., 5c; oz., 30c; 1/4 lb., \$1.25; lb., \$4.00.**

STONE. One of the best main crop red Tomatoes. The fruits are large, smooth, bright scarlet, of fine quality and has a small core. A heavy yielder of uniformly large fruits, and has proven to be a tremendous money maker wherever used. Fine for canning or home garden, and long considered the standard main crop Tomato for all purposes. **By mail, postpaid, pkt., 5c; oz., 30c; 1/4 lb., \$1.00; lb., \$3.50.**

PONDEROSA or BEEFSTEAK. The largest tomato yet introduced, frequently weighing a pound or more. The fruit is deep purple in color, slightly reddish with very solid, luscious flesh and small seed cells. Fine for family garden and market. This sort is very fleshy which makes it a good slicing Tomato. **By mail, postpaid, pkt., 10c; oz., 50c; 1/4 lb., \$1.50; lb., \$5.50.**

BONNY BEST. A vigorous growing sort of spreading, upright habit, and having large, smooth, deep green foliage. The fruits are of good size and borne in clusters of three to five. In shape they are rather flattened, but smooth and do not crack. **By mail, postpaid, pkt., 10c; oz., 35c; 1/4 lb., \$1.25; lb., \$4.00.**

ASTERS

CULTURE. Seed may be sown out doors as early as possible after ground is warm and dry, or for earlier blooming seed may be sown indoors or in cold frames and transplanted in the open ground after danger of frost is over. Sow seed about one-half inch deep, with soil firmly pressed down. Rows about 18 inches apart. We do not recommend sowing Asters in the same ground two years in succession.

QUEEN OF THE MARKET. This variety is very desirable and productive. Our mixture contains all colors of the best and most desirable sorts. Two weeks earlier than any other variety. The plants are of a branching habit, spreading 16 to 18 inches high, bearing on long stems from 10 to 15 finely formed, double blossoms. A profitable variety to grow for early market or for home garden. **By mail, postpaid, mixed colors, pkt., 10c; 1/4 oz., 30c; oz., 90c; 1/4 lb., \$2.75; lb., \$9.00.**

ROHRER'S LATE BRANCHING. A very strong growing Aster usually not coming into bloom until the later part of August, but producing on very long stems, full petalled, exceptionally large and deep double blossoms of fine form. The petals are long, rather broad, and the blooms stand shipment well. The plants are branching in habit of growth and are about two feet high. **By mail, postpaid, pkt., 10c; 1/4 oz., 30c; oz., 90c; 1/4 lb., \$2.75; lb., \$9.00.**

Queen of the Market Aster

AGERATUM or FLOSS FLOWER

For beds and borders this is one of the finest of all low growing plants, as it is literally covered with blooms from early summer until frost. Unlike any other plants the rain does not spoil the flowers, nor the sun fade out their color. Easily raised from seed, which is usually started in a window, or hot bed, and transplanted outside in May. The seed can be sown outdoors in May. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 50c.**

ANTIRRHINUM or SNAPDRAGON

New Giant Flowered Snapdragon. Antirrhinums in recent years have become very popular and is now one of our very best flowers. No other flower has such a wide range of colors. Whether planted for garden or cut flowers we know of few flowers as desirable. For blooms the first season sow the seed very early indoors, or under glass, and transplant as soon as the ground is warm and dry, setting plants about ten inches apart, and giving them plenty water. If the plants are set out in May they will bloom in June and July, and continue until late in the fall. Seed sown in the open ground in the early spring will produce plants that flower in August. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 30c; oz., \$1.00.**

DIANTHUS or PINKS

The great variety of brilliant colors and the profusion of blooms has made these garden pinks one of the most popular flowers. The plants grow about one foot high, and are particularly fine when planted in masses in beds and borders. Sow the seed outdoors in the early Spring and in a few weeks the plants will be up and in full bloom. If plants are too thick thin out to about six inches apart, when plants are two inches high.

ROHRER'S SPECIAL MIXTURE. Double. This mixture contains all the various kinds of double blooms, and will supply a wonderful array of blooms in the garden all summer long. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 35c; oz., \$1.00.**

MIXED COLORS, SINGLE BLOOMS. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 50c.

COSMOS

EARLY FLOWERING GIANT COSMOS. These are among the most popular and early grown annual flowers, making a wonderful display in beds and borders in the garden, and furnishing an abundance of cut blooms for the house decoration in the fall when other flowers are scarce. Sow the seed outdoors just as soon as danger of frost is over or may be started in cold frames and transplanted. Cosmos thrive in any good soil. Transplant about eighteen inches apart. **By mail, postpaid, pkt., 10c; oz., 40c.**

Delphinium or Hardy Larkspur

DELPHINIUM or HARDY LARKSPUR

These are the most popular of all hardy plants for the garden. The tall spikes of lovely flowers standing erect above the dark green foliage makes a wonderful display. They begin to bloom in June. They are valuable for their great variety in height. They thrive in almost any soil. A good deep soil will repay with larger and better flowers. Remove the flower before the seed pods form and they will flower again later in the season. Seed may be sown in the open ground from April until August, but it is not likely to flower until the next year. Prize Mixture. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 35c; oz., \$1.25.

LARKSPUR

Hardy Annual. During the last few years great improvements have been made by careful selection, in size and colors of the blooms of these popular garden flowers, that begin blooming in July and continue until frost. They make handsome beds and borders, and look extremely well in clumps of shrubbery. Few people realize how easy it is to grow these beautiful flowers, and how very attractive they are in the garden as cut flowers. The tall stock flowered varieties grow two to three feet high with spikes of large double flowers, over a foot long, in many shades of colors.

DOUBLE TALL STOCK FLOWERED. Mixed Colors. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c.

PROTECT YOUR FLOWERS

These Flowers will need EVERGREEN, the non-poisonous insecticide that kills all insects, to protect them. For description and prices, see page 30.

MARIGOLD

The African and French Marigolds are old favorite free flowering annuals of easy culture. Both are extremely effective. The former having uniformly large, yellow and orange colored flowers and are well adapted for large beds or mixed borders. The latter are dwarf in growth with beautifully striped flowers and are better suited for bedding purposes. They succeed best on light soil with full exposure to the sun. For best results start seed early indoors and transplant six inches apart. Good blooms are successfully obtained from seed sown in the open ground after danger of frost is past.

AFRICAN. Tall double mixed. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c.

FRENCH. Dwarf double mixed. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c.

Tall African Marigold

MIGNONETTE

A well known sweet scented garden favorite that everybody should grow. By sowing seed in April and again in July you can have a succession of bloom until frost. No garden is complete without Mignonette, the fragrance of which makes it indispensable for bouquets.

RED GOLIATH. One of the grandest Mignonette ever introduced, remarkable for color, size, fragrance and profusion of blooms. The flower spikes are immense measuring 6 to 8 inches long of fiery red color. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 35c; oz., \$1.25.

LARGE FLOWERING. Sweet scented, all sorts, finest mixed. By mail, postpaid, pkt., 10c; oz., 25c.

NASTURTIUM

ROHRER'S MIXED, TALL SORTS. A combination of many tall varieties. Colors white, cardinal, orange, rose, scarlet, etc. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 90c.

ROHRER'S MIXED, DWARF SORTS. These are adapted for beds and borders. Grow 8 to 15 inches high. A mixture of best sorts, producing when in bloom, an agreeable effect in colors of scarlet, crimson, bronze, gold and white. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

PETUNIA

Few annual plants equal in effectiveness the Petunia for growing in beds and borders, or in window and porch boxes. They commence flowering early and continue a sheet of blooms until frost. Plant the seed, which is exceedingly fine, in a warm sunny place. Any good garden soil well pulverized and in good condition may be used, and the seed covered about one-eighth of an inch of soil firmly pressed down. Re-seeds itself when once planted.

HYBRIDA. Striped and blotched. Includes striped and blotched flowers in a wide range of brilliant colors. A very satisfactory mixture. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 30c; oz., \$1.00.**

HYBRID DWARF MIXED. Plants compact growing. A very choice mixture of many shades and colors. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 40c; oz., \$1.50.**

PHLOX (Drummondii)

Unequalled in the magnificent display of their many and brilliantly colored flowers. The plants are hardy bush-like annuals with many broad flat-topped clusters of nearly round and star-shaped flowers. They are of easiest culture and bloom profusely

through a long season. They are useful window-garden plants and very desirable for combining in mixed bouquets.

Seed is usually sown very early in the Spring outdoors. A sunny location is desirable. Well pulverized and rich mellow soil should be used, and the seed, which germinates very slowly, covered with about one-fourth inch of fine soil firmly pressed down. Extra choice mixture. Best large flowering varieties. Our mixture is unexcelled for profusion of blooms and wide range of brilliant colors. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 25c; oz., 75c.**

PANSY

ROHRER'S MAMMOTH PANSY MIXTURE.

This mixture is, without doubt, one of the grandest mixtures ever offered to the American people. This seed is imported by us direct from most noted Pansy Grower in Europe, and covers a wide range of colors. The plants distinguish themselves by their robust growth, and form compact bushes of round shape, with strikingly large, healthy looking foliage. The individual petals are exceedingly broad and cover each other in such a manner as to make the flowers almost double, the beauty, brilliancy, and richness of color being the most striking; also very rare and new tones of red and brown are met with in these flowers. The more flowers you remove, the more and larger the blooms become. **By mail, postpaid, pkt., 25c; $\frac{1}{4}$ oz., \$1.50; $\frac{1}{2}$ oz., \$2.50; oz., \$4.50.**

SALVIA (Scarlet Sage)

BON-FIRE. The brilliant red flowers of this popular annual borne on long stately spikes, standing well above the foliage and blooming until frost, give this plant a prominent place in every garden. Extensively planted in flower beds and as a border plant. Seed should be started under glass or in boxes in February and March, and transplanted after danger of frost is past. A compact growing early flowering Salvia, two feet high, covered with long spikes of brilliant flowers. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 50c; oz., \$1.75.**

SCABIOSA or MOURNING BRIDE

This annual deserves a space in your garden. It is very easily and quickly grown. Blossoms very freely during summer and fall and is one of the finest of all cut flowers for the house.

GIANT FLOWERING MIXTURE. A special strain of tall double varieties. A very choice mixture. **By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 15c; oz., 50c.**

SWEET ALYSSUM

Sweet Alyssum can be grown readily either out doors or in the house and by cutting back the plants properly an almost constant succession of blooms may be had. Seed can be sown in the open ground very early in the Spring.

LITTLE GEM. A beautiful white sort for edging, borders, and rock work. The plants grow about six inches high, produce hundreds of flowers and form a compact mass of blooms usually fifteen to eighteen inches across. Hardy Annual. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 15c; oz., 50c.

SWEET PEAS

CULTURE. One ounce of seed will plant 25 feet of row. To get good Sweet Peas the seed should be sown as soon as possible. The best soil is one containing some clay. The land should be made rich with manure or fertilizer. The vines should be watered in dry weather.

ROHRER'S FANCY MIXED. A mixture of the best blend of Sweet Peas in cultivation. All choice giant-flowering varieties of every color and type. A good mixture at a low price. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

ROHRER'S MIXED SPENCERS. The newest introduction in Sweet Peas. The flower stems are 10 to 12 inches long, very strong, and usually bear four blooms. This mixture is far superior to the ordinary mixture and includes many of the best Spencer varieties. By mail, postpaid, pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

For larger and better blooms, inoculate your Sweet Peas with Stimugerm. GARDEN SIZE, POSTPAID, 25c.

Spencer Type

VERBENIA

For a brilliant display in the garden, in beds, these Mammoth Flowering Verbenias with their giant heads of showy flowers that are in bloom from July until frost can not be surpassed. For very early flowers start the seed indoors and transplant. Seed sown outdoors in May will make blooming plants in July.

MAMMOTH. Extra large flowered. A fine mixture. Cultivated from select plants. By mail postpaid, pkt., 10c; $\frac{1}{4}$ oz., 25c; oz., 75c.

Verbenia

SWEET WILLIAM

A well known attractive free flowering hardy plant, bearing in the early summer flowers of rich and varied colors that make a splendid show in beds and borders.

Double mixed. Double flowers in a splendid mixture of colors. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 75c.

ZINNIA OF YOUTH AND OLD AGE

The Zinnia is easily grown and begins to bloom early in the summer and continuing until frost. Sow the seed early in the Spring in the open ground in rich soil covering about one-fourth inch. When the plants are young thin to six inches apart. It is best to sow the seed where they are to flower.

DAHLIA FLOWERING MIXED. A new Zinnia that bears Mammoth Flowers similar to the Dahlia. This type is especially good as a cut flower. A splendid combination of brilliant colors. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 35c; oz., \$1.25.

Zinnia of Youth and Old Age

CLOVER, GRASS AND FIELD SEEDS

Field of Domestic Broad Clover

CLOVER SEED

Of all the crops grown on the farm Clover is the most important, not because of its market value and importance as a forage crop, but its great value as a fertilizer. Many farmers hesitate using this valuable seed as freely as they should. There are many profits derived from Clover, and it must be plain to any farmer that he can not afford to economize too much in its use. As a forage plant one of the different varieties is adapted to every section of the country, and taken all together there can be no doubt that the Clovers are the most valuable of all forage crops.

By using good seed the grower is most likely to derive a benefit, first from the hay crop, and greatest of all, the upbuilding and maintenance of his land.

The sowing of Clover is absolutely essential to proper rotation of crops and to keep up the fertility of the land. The progressive farmer will sow Clover seed liberally in order to keep up the productiveness for other crops. A good crop of Clover will restore fertility to land and put more humus into the land than almost any other crop.

We sell only the very highest grades obtainable. Highest in Purity and Germination. Why not grow a few more loads of hay from the same acreage. Sowing our GUARANTEED SEEDS will help you do it. We specialize in Clovers, and feel safe no one can offer better values, either as regards to quality or price. No department receives more attention than that given our Clover Seed, and it constitutes a large percentage of our entire Seed Business.

SOIL. Clover makes its best growth on rich, fertile, well drained limestone soil, but will flourish on most any soil where there is sufficient rainfall, if the seed is inoculated; for Clover will grow and flourish in a soil that is low in nitrogen as long as there is a sufficient supply of bacteria to start the plants until they have an opportunity to develop tubercles on the roots for the purpose of gathering nitrogen from the air and storing it in the soil.

Hollidaysburg, Pa., July 2, 1929.

Will send for Clover seed after the 8th of this month as your seed looks fine. Sam. DeLozier.

DOMESTIC BRAND MEDIUM RED CLOVER

“Medium Red Clover” also known as “June Clover” is by far the most important Clover in our Country. Medium Clover is second to none as a soil strengthening crop, adding fertility to the soil, making it possible to grow larger and better crops of corn and other grains. It grows about two feet high yielding two to four tons of hay per acre. This is also valuable for pasturing. The long roots penetrate deeply into the soil gathering nitrogen from the air and storing it in the soil in the form of nodules on the roots, thereby providing rich foods for crops, cereals, etc., which follow it. Quality of seed is very important. When sowing Clover seed be careful to sow nothing but pure, clean seed, which are plump and will germinate readily and produce hardy vigorous plants. You cannot afford to waste your time and money on poor seed. Many farms and crops have been almost ruined by sowing low grade seeds containing noxious weeds. If you do not want weeds don’t sow them. Use our DOMESTIC BRAND CLOVER and you need not worry about polluting your farm with noxious weeds. Don’t fail to get our samples and prices before placing your order, as you will find nothing better than our DOMESTIC BRAND CLOVER. If sown alone use six to eight quarts per acre. Where Timothy has been seeded sow four quarts per acre. See price list.

What is “Domestic Brand”?

When we quote “Domestic Brand Clover” it means the highest quality that money can buy, no weeds, no chaff, just pure seeds that have been thoroughly cleaned and carefully tested.

Mt. Vernon, N. Y., May 23rd, 1929.

P. L. Rohrer & Bro.

My order arrived in excellent condition. Thanks for prompt attention.

Mrs. H. Kelly.

CHOICE MEDIUM RED CLOVER

Choice Medium Clover is found superior to the seed sold by the average dealer. It is in every way equal to the So-called "Best Grades" on the Market. This seed will surpass Prime in Purity and Growth.

Our Choice Clover is grown in Northern France. This seed according to the different tests made at the Agricultural colleges has yielded as much Hay per acre as Domestic Seed, and is adaptable to the Eastern States. According to the Ruling of the Department of Agriculture French seed must be stained one per cent Green. Staining will not affect the germination. See Price List.

GENUINE MAMMOTH RED CLOVER

MAMMOTH CLOVER, also known as "Pea Vine" and "Sapling," is very much like the Medium. It matures about two weeks later than the Medium. The Mammoth develops a stronger root and top development than the Medium. It produces less pasture after the crop is cut than Medium. For restoring land or for general fertilization there is nothing more valuable than Mammoth Clover. It yields a large growth and when turned under will loosen and improve the working of heavy clay soils better than any other crop. There is no difference in the appearance of the seed. We, therefore, handle only such lots as can be obtained from the most reliable sources, direct from sections growing Mammoth almost exclusively. We take the same care in selecting our Mammoth seed that we do in securing our best grades of other Clovers. In quality our Mammoth Clover is equal to our Medium. We only sell one grade, DOMESTIC BRAND MAMMOTH. Sow about the same rate per acre as the Medium. See price list. Use Stimugerm to insure Bumper Crop.

Mammoth Clover

WHITE CLOVER

White or Dutch Clover is a perennial of a creeping nature, and is used mostly in Lawn Mixtures, although it is a valuable addition to Pasture Mixtures, using one to three pounds per acre. Adapted to low meadows where not too wet. On low lands suited to its growth it will last indefinitely, although it may be crowded out by other grasses certain seasons only to reappear the next. Invaluable in Lawn Mixture, imparting a rich green to the lawn, and holding its color with the grasses till after freezing. See price list.

Great care in the selection of clean, hardy seed will result in larger crops at harvest time. Send in your orders; they will be filled promptly with Rohrer's Sure Pay Seeds—Few Equal—None Better—Highest in purity and germination.

ALSIKE CLOVER

Alsike Clover is increasing in popularity very rapidly. It makes the best combination with Red Clover and Timothy, either for hay or pasture, and grows well on high as well as on low wet soils. It is specially adapted to wet soils and also on soils that are too low in humus to grow Clover. When sown with other grasses it forms a thick bottom and greatly increases the yield, and the quality of the hay is better. When well cured there is no hay more greatly relished by stock of all kinds. Mixed with Clover and Timothy it affords one of the best forage rations, and the three are grown successfully together, the hay from such

INOCULATE THIS
SEED WITH
STIMUGERM

Alsike Clover

a mixture being better than either of them alone. The seed is smaller than the red Clover, therefore does not require as much seed per acre. Alsike is hardier than Medium or Mammoth Clover, but lodges more than either, and for this reason it is better to sow it with Clover and Timothy. If sown alone sow eight to ten pounds per acre. Alsike is a perennial, and because of this characteristic is especially valuable for growing on land where one wishes to secure a permanent pasture or meadow. See price list.

CRIMSON CLOVER

Crimson Clover is especially valuable as a cover crop and for green manure. In feeding value it is even higher in protein than Red Clover, and makes one of the best Clovers for silage purposes. It is a wonderful producer and is especially relished by all live stock. Crimson Clover has been used extensively as a fertilizer crop, sowing it in the last working of the corn, used as a cover crop during the winter and plowed under in the Spring will grow greatly increased crops.

INOCULATE THIS
SEED WITH
STIMUGERM

WHEN TO SOW. Crimson Clover can be sown to advantage any time from beginning of July to October. Land should be well prepared before sowing seed, and not covered too deep. It is one of the cheapest legumes for soil improvement, and will thrive on poor lands and will add fertility. It will pay you to use this seed liberally. Sow 15 pounds of seed per acre. We handle only one grade, highest in purity and germination. It will pay you to inoculate Crimson Clover with Stimugerm. See price list.

Duncannon, Pa., May 20th, 1929.

P. L. Rohrer & Bro.

We are very much pleased with the Seed Potatoes we received from you. Mrs. Chas. S. Flickinger.

Northwest Alfalfa

NORTHWEST ALFALFA

Alfalfa should be grown on every farm, and now holds an important place in agriculture, especially in sections where dairying is carried on. It is adapted to every State in the Union. Most failures are traceable to low grade or Southern seed. One thing is absolutely essential, that is to begin right, and be sure that you use only Northern Grown Seed that will stand the winters.

After Alfalfa is once established it lasts for several years, yielding three to four cuttings every season of the most excellent and nutritious hay, which is readily salable at top prices. We recommend the Northern Grown Seed. We have found it more dependable than Western or Southern Grown Seed. Many interesting facts in addition to above might be cited about Alfalfa. It would hardly be possible to say too much about Alfalfa; it is a working plant which is changing the destiny of many farming sections.

Alfalfa is the farmers' government bond. He clips off the green coupons three or four times, and leaves the original bond intact, indestructible, prolific, the prosperity of any community. It is the symbol of high social and intellectual culture. In communities interspersed with green fields of alfalfa, we find pure-bred stock and well fenced farms with comfortable and beautiful farm buildings.

Alfalfa is the farmers' deep tillage machine that penetrates deeply into the subsoil, admitting air and water, and bringing to the surface stores of plant food from below, that would otherwise remain out of reach of the plow and cultivator.

Alfalfa should be grown on every farm. It surpasses all other crops in yield, in feeding value, as a drought resister and as a builder of the soil. It enhances the value of every farm.

Pittsburgh, Pa., May 20th, 1929.

As the Garden season draws near my thoughts quite naturally turn towards you folks in Smoketown, who have furnished me with such reliable seeds in the past.

J. G. Hargrave.

Meadville, Pa., June 15th, 1929.

Received order this morning in fine shape. Thank you.

FACTS ABOUT ALFALFA

There is no state in the Union in which Alfalfa cannot be successfully grown.

Alfalfa produces from three to seven tons of hay per acre.

It has as much Protein as wheat bran.

Three hundred and sixty stalks have been grown from one seed. It does not exhaust the soil, but enriches it. It will grow from three to five crops per year.

Alfalfa in money value is worth 45% more than other Clovers, and 60% more than Timothy.

One acre will pasture 20 pigs for six months.

Three pounds per day makes a full feed for fattening lambs.

Four to five pounds makes a full feed for fattening aged sheep.

Sheep fed on Alfalfa will gain from 8 to 15 pounds in 75 days and will double with small grain ration added.

Lambs wintered on Alfalfa will produce from one to two pounds more wool than when on a ranch.

Fed to Dairy cows Alfalfa maintains the flow of milk equal to June grass. It can be chopped fine with corn meal. Such a mixture is worth more a pound than the original Corn Meal.

SELECTION OF SEED VERY IMPORTANT. It is very important to use Alfalfa that is of a hardy

**INOCULATE THIS
SEED WITH
STIMUGERM** strain. There is no better proof that a strain is hardy than that it is grown in the Northwest, where the winters are severe and the ground freezes eight feet or more. Alfalfa raised under these conditions must be of the hardiest strains, and will stand the most trying conditions. We have again secured a very choice lot of Genuine Northern Grown Alfalfa, fully matured, as pure as is possible to grow. High in germination, full of seed life, plump and attractive. You can sow no seed that will give better results than our Northern Grown Seed. See price list.

Semesan, Semesan Jr., and Semesan Bel.

The three outstanding disinfectants for controlling plant diseases and treating seeds, bulbs, potatoes, etc., before planting. Let us send you full information on these products, and free booklets. See page 28.

GRIMM ALFALFA

Many years ago a man by name of Wendelm Grimm, from Germany, settled in Minnesota. He brought with him seed of an Alfalfa which he called Norwegian Alfalfa. It became known, however, as Grimm's Alfalfa and obtained more than a local reputation on account of its productiveness, and extra hardiness, for it survived winters that killed out many fields of other varieties of alfalfa. Of course, this was before Northern Grown Alfalfa seed was procurable. Grimm Alfalfa was selected from the hardiest plants year after year until it became a fixed type of extreme hardiness and vigor. It differs somewhat from other varieties in the crown of the plant, being receding, and is therefore protected by the surface of the soil. The roots are also fibrous instead of having one long tap root. See price list.

FANCY TIMOTHY

Timothy is the most valuable of all grasses. Our Fancy Timothy is guaranteed to be high in purity and germination. We know you will be pleased with this seed. A good stand is easily secured. It is used more extensively than any other of the Grasses, or Clovers. Grows rapidly and produces hay that commands the highest market price. Timothy seed is sown with Clover and Alsike and makes very good hay. It is also valuable in pasture mixtures. Timothy Seed is low in price compared with other Clovers, therefore, extreme care should be taken to sow best seed obtainable; highest in Purity and Germination. When sown alone sow eight quarts per acre. If sown with Clovers sow three to four quarts per acre. See price list.

Rohrer's Fancy Timothy.

TIMOTHY and ALSIKE

This seed is grown and harvested together and is sold for less than you can buy the seed separate. Our seed is recleaned and runs 20 per cent Alsike. These two crops are well suited for growing together and will thrive on any land located anywhere within the clover belt, for although this crop reaches its highest state of perfection on moist low land it can be grown anywhere with good results and makes good hay. About 12 to 16 lbs. per acre is required. A trial of this mixture will add to your profits. See price list.

SWEET CLOVER

Sweet Clover resembles Alfalfa, both in appearance and habit of growth, when young. Grows larger than Alfalfa. When properly handled Sweet Clover is a valuable addition to the farm crops in many sections.

**INOCULATE THIS
SEED WITH
STIMUGERM**

It is efficient as a soil renovator, by reason of the large amount of nitrogen it will be able to take from the air, as well as the humus added to the soil when turned under, for the decay of the roots when it is harvested. No other forage or soil crop has ever come into such favor as White Blossom Sweet Clover. It is, however, not strange that this is true, for no other plant possesses so many merits. If it had no other property than its ability to inoculate soil for Alfalfa it would be a wonderful agency, but in addition to this it is one of the best forage plants possessing all the feeding qualities of Alfalfa. It will establish itself in a greater variety of soils than any other legume. As a fertilizer it equals or even surpasses Red Clover, and especially is this true where soil is lacking in humus, as the large fleshy roots of Sweet Clover furnish a great amount of this essential element in addition to the nitrogen supply by Red Clover. As a soil builder either for naturally poor soils or those that have been exhausted, no other plant can take its place. It is also one of the best crops for Bees from which to gather honey, and many prefer it to White Clover. Seed is much lower than Red Clover. Analysis and feeding experiments indicate that it is nearly equal to Alfalfa in feeding value. There is nothing better to bring your worn out land into farmable condition. To get full value out of your Sweet Clover inoculate with Stimugerm. See price list. Inoculate your Sweet Clover with STIMUGERM if you want the biggest yield and maximum fertilizing value.

Sweet Clover

ORCHARD GRASS

Orchard Grass makes a desirable grass on account of its quick growth, and valuable aftermath. It starts growing earlier in the Spring and stands dry weather better than any other grass. We would recommend it mostly for pasture, and more especially when sown

alone. If you have never grown Orchard Grass, try a little this year. It will last for years without the necessity of resowing. May be sown either Spring or Fall on any kind of soil. About two bushels per acre is required. See price list.

A Field of our Special Hay Mixture

SPECIAL HAY AND PASTURE MIXTURE

For ordinary Spring seeding this mixture cannot be beaten. The proportion is approximately six pounds Red Clover, three pounds Timothy, two pounds Alsike and one pound Alfalfa. Sow 12 to 15 pounds per acre on well prepared seed bed. Having it mixed this way saves extra bags, extra weighing, and extra profits, sampling, etc., and positively cheaper to you than if you bought each separately. None but the best seeds are used in this mixture, and it is suited to nearly all soils, and will grow in every section. This

mixture should be used very extensively for either hay, pasture or soiling purposes. When seeding Timothy in the Spring always use Red and Alsike for best results. This mixture, we believe, will meet with your approval and be a money saver, and on this basis we offer it to the public. It reduces the cost of your seeding and is an excellent grass combination for hay. We mix this seed, and positively none but best grades are used, this insures you a mixture that is free of noxious weeds. See price list.

KENTUCKY BLUE GRASS

Kentucky Blue Grass may be sown Spring or Fall. It is one of the best grasses for pasture mixtures. There is no other Pasture Grass that meets with as much favor. It has many advantages for general purposes. It is extremely hardy, and stands the severest droughts, and coming on early in the Spring and growing late in the Fall, recommends it as the

PERMANT PASTURE MIXTURE

grass that every stock raiser wants. As a pasture there is nothing better than Kentucky Blue Grass, as it forms a tough, closely knit sod that is not injured, but really benefited, by trampling of grazing animals. It requires a good soil containing some lime to yield profitable crops. When sown alone, sow 35 to 40 pounds per acre. See price list.

PERMANENT PASTURE MIXTURE

Good pasture is the foundation of the riches of a farm. One of the most valuable crops of successful stock and dairy farming is abundant pasture. Our mixture yields a very heavy crop of the finest and most succulent grasses early in the season until late in the fall, and is intended especially for seeding pasture grounds. Several varieties are used in this mixture, a combination of grasses of different habits and seasons of growth and can be depended upon to produce a turf that will stand the trampling of stock, and as the different grasses have different habits of growth they grow close together, their roots interlacing

covering the soil and forming a protection from the extreme heat, cold and dry weather, enabling these grasses to retain a rich green appearance from early Spring to late Fall. These mixtures are recommended for either Spring or Fall sowing. If sown in the Spring sow with a nurse crop. About one bushel of Oats or Barley per acre is very desirable.

Two mixtures are made: One for well drained up-land, called Highland Mixture, and the other for lowland meadows, which is called Lowland Mixture. Sow 25 to 30 pounds per acre. See price list.

CAHOON SEED SOWER

Buy the Famous Cahoon Seed Sower by Parcel Post.

The Cahoon is scientifically constructed to scatter the seed evenly in front of the operator. This sower has been in use all over the world, and has been proven to be the simplest, most accurate, and durable sower made. It is made of entirely all steel, iron, brass, and heavy canvas, and sows grain or grass seeds. Needed on every farm. Order today. Satisfaction guaranteed. \$4.50 postpaid to you. Even seeding brings good reaping.

Result of our Fancy Lawn Grass Mixture

LAWN GRASS

Our Fancy Lawn Mixture is composed of the very best grades of seed. These grasses will make a quick growth and cover the ground in a few weeks after sowing the seed, and form a rich green turf. Can be sown either Spring or Fall. For best results Spring sowing is most favorable. One pound seed will sow 200 square feet of ground. Seed should be raked in slightly, and after seeding soil should be pressed down firmly. Seed should be covered one-fourth to one-half inch. See price list.

RED TOP

This is a valuable grass for either hay or pasture. It ranks second to Timothy in production of hay and makes excellent pasture and good crops of fine hay. It is valuable for seeding alone or to seed along with Timothy, Clover and other grasses. Can be sown in Spring or Fall. It succeeds better and is adapted to a

wider range of soils than any other grasses. It is hardy and will make a heavy sod, and it should be a large constituent part of all mixtures intended for permanent pasture. If sown alone use 10 to 12 pounds of hulled or solid seed. We handle the solid seed and do not recommend sowing the unhulled seed. See price list.

SWEDISH SELECT SEED OATS

Considered by many to be the most valuable Oats raised in the Northwest today. An extremely productive variety with tall, stiff, straw, bearing long heads filled with good weight grains. It possesses striking features, the grain is short, plump, white and heavy, under favorable conditions averaging 40 to 42 pounds per measured bushel. Owing to the great root development it stands very high for its drought resisting qualities. Those who prefer a white Oats for spring seeding will make no mistake in sowing Swedish Select. Our seed was grown in the Northwest. Our experience has proven to us that all kinds of seeds grown in the Northwest are harder, more vigorous, and more productive than Southern or Western Seed. This is particularly true of Seed Oats. Try our Northern Grown seed this year and grow a Bumper Crop. See price list.

Swedish Select Oats

BARLEY

BEARDED BARLEY. Barley should be grown more than it is. It will do well most anywhere in every state. It is also one of the best grains for a nurse crop for Alfalfa when started in the spring. Barley culture is similar to that of Spring Wheat or Oats. To produce large crops of Barley the soil should be well prepared to receive the seed. It is heavier than Oats and will yield more bushels per acre. It is a splendid feed. Barley should be sown as early as Oats, if possible, but will stand late planting better than Oats. Sow about two bushels per acre. See Price List.

Grow Your Own Protein. Soy Beans for the silo. It has been found profitable to raise Soy Beans to put in the silo with corn.

SEED CORN

Possibly no other County in the world is better adapted to the growing of Seed Corn. The deep fertile soil and the favorable climate of Lancaster County produces strong vigorous seed that has no superior. Anyone buying Seed Corn from us can test it on arrival and if not found satisfactory it can be returned at our expense and your purchase money will be promptly refunded.

90 DAY YELLOW DENT

This is the earliest variety listed. It will mature in 90 days. This variety will do well North of Pennsylvania. Grains are of good size. Color is a rich yellow. Where the season is short you will find this variety profitable to grow. See price list.

BOUNTIFUL YELLOW DENT

This is one of the most profitable varieties to grow, and is very popular in this part of Pennsylvania. It matures in 105 days, or about 10 days later than Improved Leaming. Because of its great root development it will withstand more drought throughout the season than any other variety. It is an exceptionally strong, robust grower, and is considered one of the best varieties in cultivation where the season is not too short. We do not recommend it in the extreme northern part of Penna. and N. Y. State. The ears attain an immense size, and because of its medium sized cob makes it a profitable Corn to shell. One bushel shelled corn will plant eight acres. See price list.

Bountiful Yellow Dent

Lancaster County Sure Crop Corn

LANCASTER COUNTY SURE CROP

This is one of the best varieties for cribbing as well as a silage Corn. It is recommended very highly by many Farm Bureau Agents, and some of the best Dairy Farmers grow this corn exclusively for ensilage. The fodder is very tall and leafy. It withstands drought and develops ears early. The ears are very long, but not very thick. The grains are filled out well at both ends; cob is very thin, therefore shells very satisfactory. Lancaster County Sure Crop contains more protein than any other Corn we know. It is a sure cropper and will mature in any part of Penna. and Ohio. See price list.

RED COB WHITE ENSILAGE

A long narrow white grain and is sold as a special Ensilage Corn. A tall rank grower and prolific in leaves. In the North where the season is short the corn will not fully mature. We can recommend this variety where the season is not too short. We can furnish good quality seed. All our Seed Corn germinates 90%, or better. See price list.

Semesan Jr. should be used to disinfect seed corn before planting, to destroy such disease germs and fungus spores as adhere to their surface coat or in some cases exist internally. Semesan Jr. possesses

remarkable properties for sterilizing seeds, accelerates germination, stimulates growth, influences earlier maturity, develops sturdier plants, and increases yields. See page 28. Write for free Corn Booklet.

MAINE-GROWN SEED POTATOES

Plant Guaranteed Stocks—It Will Increase Your Profits

FOR PRICES ON SEED POTATOES, SEE PRICE LIST. FREIGHT PAID OFFER DOES NOT APPLY ON SEED POTATOES.

Our stocks of Maine-Grown Seed Potatoes were grown especially for seed by most reliable seed growers in Aroostock County, Maine, and shipped to us in carload lots. All seed carefully selected, and being true to name, will produce much larger yields, and Potatoes of a finer quality than the home-grown stocks usually sold on the open market for seed. ALL SEED GUARANTEED TO PLEASE PURCHASER AND SOLD ON THE MONEY-BACK PLAN. If not satisfactory upon arrival Potatoes may be returned and money will be refunded.

Potatoes are shipped in heavy burlap sacks for which we make no charge. We begin shipping in the Spring as soon as the weather permits without freezing. Unless otherwise mentioned, PURCHASER PAYS FREIGHTOREXPRESSCHARGES ON ALL SEED POTATOES.

EARLY SURPRISE. This variety is without doubt the earliest white potato in existence. It is round to oval in shape, flesh white and firm, and far more productive than most early potatoes. If you want first early potatoes you will not go wrong in planting this variety.

IRISH COBBLER. An early white skinned variety, very short, thick and inclined to round. This variety is yearly increasing in popularity for early markets. The crop is ready about 10 days earlier than Early Rose. The vines are very stocky, vigorous, and not as liable to be affected with blight or suffer drought as most other varieties. Owing to the fact that the Cobbler withstood the severe drought last season better than other varieties, it is probable that there will be a larger demand than usual this season. We advise ordering early.

EARLY ROSE. The stock we offer is the genuine Old Standard Early Rose, pure and true-to-name. While this is one of the oldest varieties it still retains its popularity. You will not go wrong in planting at least a few of this sort.

Pyrox
REG. U. S. PAT. OFF.
TRADE MARK REGISTERED

SPRAY YOUR POTATOES WITH PYROX

Kills Bugs and checks blight. Mixes easily—sticks like paint—will not clog. Get bigger yields.

Good Potatoes come from strong stout healthy vines, enabled to benefit fully from soil, air, rain and sunshine, and PRODUCE TO THE LIMIT, when Sprayed with PYROX which kills insects, stops fungous troubles, and stimulates foliage on all kinds of crops. All ready to mix with water and spray.

Irish Cobblers

RUSSETS. One of the best for main crop cultivation. Similar to the Raleigh in shape of tuber but has a russet skin and few eyes. This is a very hardy sort and usually produces good yields even when seasons are unfavorable. Vines grow vigorous, has fine blight resisting qualities and usually remain green until late in fall. This variety outyielded other varieties two to one in many sections last season, planted side by side. The stock we offer this season are Certified Northern Michigan-Grown Seed. Grown from Tuber-Unit Stock.

EARLY OHIO. A sort that is well known to market gardeners. The tubers are round with pink skin and excellent quality. Grows quickly, cooks mealy and keeps well for an extremely early variety. Our stocks are true-to-name and will please you.

VERMONT GOLD COIN. This is a very popular main crop sort. We have found it to be a very desirable and profitable potato to grow. Vines are very heavy in growth and seldom known to blight. Tubers are large, white and lie close together in the hill. The flesh is fine grained and excellent for table use, retaining its fine eating qualities until late in spring. You will be highly repaid if you give this variety a trial.

IMPROVED GREEN MOUNTAINS. This variety has proven to be the surest cropper and one of the most profitable sorts to grow. The skin is pure white, slightly netted. The quality is one of the best. An excellent keeper and its fine table qualities makes it one of the foremost sorts in the large City markets. Shippers prefer this variety and frequently pay a premium. The best for loose and muck soils, and especially adapted for Northern states. If you plant this variety it will increase your profits.

Order your seed potatoes now. Your order will be booked for future shipment at present prices if \$2.00 cash per sack is sent with order. Balance to be paid before potatoes are shipped.

Vetch

SAND OR HAIRY VETCH

Also known as winter Vetch. It is a rapid grower and thrives on little moisture. It is a winter annual and can be sown Spring or Fall. Stays green all

winter furnishing an abundance of pasture until early spring to late in Fall. It is a tremendous yielder, producing 15 to 20 tons green forage per acre. As a fertilizer it has few equals, as it grows on poor soils exceedingly well, and a crop of vetch plowed under is claimed to be equal to \$20 to \$40 worth of Commercial Fertilizer. Sow about 40 pounds Vetch and about one-half bushel of Oats or Barley. The grain sown with Vetch will act as a support for the vines. Vetch should be inoculated with Stimugerm for best results. See price list.

**INOCULATE THIS
SEED WITH
STIMUGERM**

MILLETS

GOLDEN MILLET, also known as **GERMAN MILLET**, is the best for hay or fodder. When cut in full bloom the quality is exceptionally good and all kinds of stock relish it. On good soil a yield as high as five tons per acre may be expected. Sow 35 pounds per acre. See price list.

JAPANESE MILLET (*Billion Dollar Grass*). The best soil on which to grow this Millet is that which is in fair condition of fertility and inclined to be wet rather than dry. Japanese Millet is adapted to all seasons. It will grow six to eight feet high. It is excellent for silage. It is fully equal to the best corn fodder as a food for milch cows. The seed may be sown broadcast at the rate of 20 to 25 pounds per acre. This variety stools remarkably and should not be sown too thick. See price list.

INCREASE YOUR MILK YIELDS USE KOW-KARE

Kow-Kare is not a Food. Neither is it a Stimulant. It is a Builder. Cows conditioned with Kow-Kare thrive on their natural diet—seldom are troubled with costly ills and disorders. You'll be amazed at the gains in milk yield. Large size, \$1.15; small size, 60c.

DWARF ESSEX RAPE

This plant is a most valuable forage crop. One acre of it will pasture more hogs, sheep and cattle than four acres of Clovers or other grasses. As a healthy fattening pasture food it has no equal. It is an annual, producing large leaves, and can be sown any time from early Spring until September, and is ready for pasture 6 to 8 weeks after sowing. It grows well on soils that will produce corn, wheat, turnips or cabbage. It stands out without a rival for cheapness and effectiveness. It is the simplest crop grown. You can sow any time, and any where after danger of frost is past. It will fatten sheep and hogs, and increase the flow of milk in cows. Sow four to five pounds per acre, broadcast. See price list.

MARQUIS SPRING WHEAT (Beardless)

Marquis Spring Wheat is undoubtedly the heaviest yielding type in existence today, and anyone needing Spring Wheat will certainly do well to order this splendid variety. Remarkably early, productive, unexcelled in milling qualities. The seed we offer is grown in the Northwest. Our stock is clean and pure, and we believe as nice as ever has been offered for seed. See price list.

LANCASTER COUNTY GROWN SEED WHEAT

Next fall we again expect to be able to furnish you with Pure Seed Wheat. Possibly no other county in the world is better adapted to growing of Seed Wheat. The deep fertile soil of Lancaster County produces strong, vigorous seed that has no superior. We will be in a position to furnish both Smooth and Bearded Varieties. When you are in the market for Winter Seed Wheat write for samples and prices.

BUCKWHEAT

Buckwheat can be planted from June 1st to middle of July and is used much by Farmers having vacant land upon which they were unable to get planted an earlier crop, or upon land where another crop has failed. Buckwheat does well on poor soil and makes one of the best fertilizer crops to turn under. A small patch planted near the poultry yard can be harvested by the Chickens. Sow one bushel per acre.

JAPANESE. This is the standard and most popular variety of Buckwheat, and ripens a week earlier than the Silver Hull. It is the most productive and prolific variety in cultivation. It resists drought and blight well. See price list.

SILVER HULL. This variety is early and remains longer in bloom than any other variety. A fine variety for Honey Bees. It is more productive, and the grain meets with more ready sale, bringing higher prices than other varieties. See price list.

SUDAN GRASS

Sudan Grass is a tall grass, which grows from four to seven feet high. The stems are small and leafy. It is like the Sorghum or Millets, and must be started each Spring. It is easily cured for hay and stock will eat it readily. May be cut from two to four times in one year. The crop should be cut for hay as soon as the grass is full headed, and early cutting is advised when the crop is to be used for hay. See price list.

Wilson's Soy Beans

WILSONS'. This is the most popular variety in cultivation. This is an early sort that will mature seed in Penna., Ohio and N. J. On account abundant growth of slender stems and branches the Wilson makes the best sort to grow for Hay. This is also an excellent sort to grow for seed and ensilage. Will do well on poor soils and produce a large crop of beans, but we would recommend good soil for hay, forage, soiling, silage or green manure. See price list.

MAMMOTH YELLOW. This is a medium maturing variety. Will not mature seed in Pennsylvania and Ohio. Will grow on barren soil that does not have sufficient fertility to grow other plants. Planted largely as ensilage with corn, or used for forage or turned under for soil improvement. Not such a good variety for hay, grows very tall, and is coarser in texture than Wilson. Will make more growth, and more bulk for silage than any other variety. See price list.

STANLEY'S CROW REPELLENT

WILL ABSOLUTELY PREVENT CROWS AND OTHER CORN PULLING BIRDS AND ANIMAL PESTS SUCH AS MOLES, WOODCHUCKS, SQUIRRELS, ETC., FROM PULLING CORN.

Small can, for one bushel of seed corn.....\$1.00
Large can, for two bushels of seed corn.....\$1.50

SOY BEANS

The Soy Bean is a crop of interest to all classes of farmers, and is bound to establish itself as one of the most valuable additions to American agriculture. No crop has

**INOCULATE THIS
SEED WITH
STIMUGERM**

gained popularity as rapidly as Soy Beans. On land too poor to

grow Clovers, Soy Beans and Cow Peas can be made to produce great quantities of feed and will increase the fertility while doing it. Soy Beans should not be planted until the ground is warm. About ten days after corn planting would be safe. Soil should be well prepared, just the same as you would for corn. Seed should be covered about one and one-half inch deep. Can be sown broadcast or drilled in. If drilled in with grain drill sow one and one-fourth bu. per acre. Broadcast will require one and one-half bushels per acre. Sowing them in rows of 24 to 32 inches apart and two to three inches in the row will save seed and you will be able to cultivate your crop. Cultivate it as often as you would Corn. This method of planting will require 20 to 30 pounds per acre, depending on the width of the rows.

The growing of Soy Beans has long since passed the experimental stage. Their adaptation to all parts of the country, and their value and place in agriculture, apparently surpassing all other legumes, has been determined. Their high feeding value and their usefulness as soil improver makes them valuable additions to our list of field crops.

CANADA FIELD PEAS

The demand for Canada Field Peas increases every year. It is used both as a green feed and as a fertilizer. The amount of feed produced per acre is very large. It is also valuable feed for hay or soiling. It is readily eaten by all kinds of stock, and is as nourishing as can be desired. It ranks very high as a fertilizer, either when plowed under or pastured off. We would advise every farmer to use Field Peas more liberally than many of them have been doing in the past, knowing that they will be pleased with the results. Canada Field Peas are mostly sown with Oats. When growing

**INOCULATE THIS
SEED WITH
STIMUGERM**

they furnish the nitrogen so much needed by all soils. As a forage for dairy cows and hogs they stand in the front ranks.

There is no crop that we can so heartily recommend. They are perfectly hardy and will do on any soil adapted to Oats or Wheat. Canada Field Peas are most profitable when sown with Oats. The Oats will support the vines, and lessen trouble to harvest. Sow 1½ bushels of Peas per acre, and about the same amount of Oats. Peas should be drilled first about 3½ inches deep and the Oats sown 2 inches deep. See price list.

It will pay you to inoculate your Peas with Stimugerm. Great quantities of Stimugerm are used each season to inoculate the seed for Canada Field Peas. Inoculation of this crop with Stimugerm will increase the growth of the Pea crop and add value to the succeeding crops that will be produced on the same ground. (See description of Stimugerm on page 15.)

Mifflinburg, Pa., Feb. 21, 1928.

Just want to say I have been planting New Century Beet the past two years, and am doing the same this year, for I find it the best beet I have ever used, even when quite large it is very sweet and tender. Your description of it in your catalog is not one bit exaggerated. I could say this of all the seeds I have bought from you, for they have given perfect satisfaction.

Sincerely, Mrs. W. F. Ruhl.

DISEASE PROTECTION FOR $\frac{1}{4}$ c TO 1c PER POUND OF SEED

Makes Seeds Healthy

SEMESAN is the answer to the disease problems of flower growers. The grower of the asters illustrated above reports that Semesan seed treatment, by controlling wilt, produced his first successful crop in five years.

Semesan is easily applied in either dust or liquid form. No special skill or equipment required. Increases germination and produces larger yields of finer flowers at a cost of from only $\frac{1}{4}$ c to 1c per pound of seed. Ask for Semesan Flower Booklet.

SAFEGUARD YOUR CORN

with **SEMESEN JR.**
Makes Seed Corn Healthy

Diseased Ear of Sweet Corn

A simple dusting of seed corn saves time, money and materials in planting. Three ounces of Semesan Jr. will treat one bushel of seed. A cost of only 4 cents an acre of field corn and 6 or 7 cents per acre of sweet corn. Why take chances when such low cost protection is available? Prices: 4 oz., 50c; 1 lb., \$1.75; 5 lbs., \$8.00; 25 lbs., \$31.25; 100 lbs., \$120.00.

Ear, root and stalk rots that attack America's corn crop cause an annual loss of \$200,000,000, often destroying from 10 to 50% of an entire planting. The illustration shows how disease attacks the ear. Fortunately through the disinfection of seed corn with Semesan Jr. these diseases are not only controlled but largely prevented.

DISEASE-FREE POTATOES

SEMESEN BEL
Makes Seed Potatoes Healthy

Semesan Bel, prepared especially for the seed disinfection of white and sweet potatoes, in addition to its advantages of dust application, is the only disinfectant which can be applied as an *instantaneous dip*. Semesan Bel instantaneous dip is sweeping the country and rapidly displacing the formaldehyde and bichloride treatments.

Semesan Bel, by controlling diseases which sap the vitality of seed potatoes, gives the seeds a chance to germinate quickly, producing sprouts of healthy vigor from which grow increased yields of clean, healthy plants and tubers. Prices: 4 oz., 50c; 1 lb., \$1.75; 5 lbs., \$8.00; 25 lbs., \$31.25; 100 lbs., \$120.00.

STIMUGERM

LEGUME INOCULATION

*The Best Inoculation
for All Legume Seeds*

MEANS BETTER SOILS
BETTER CROPS
LESS FERTILIZER EXPENSE

Same seed, same soil, same field, planted same time—only difference was one was inoculated with these cultures. The two roots grew not more than 15 feet from each other.

Seeds of all legumes—Clovers, Alfalfa, Sweet Clovers, Beans, Peas, Vetches, Soy Beans, Cow Peas, etc.—will yield far better results if inoculated with STIMUGERM, and, in addition leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops in the rotation.

**A Sensible Insurance
and a Profitable
Investment**

STIMUGERM is a pure culture of nitrogen-fixing bacteria selected for maximum

vitality and ability to transform the nitrogen from the air into soluble nitrates and deposit them in the soil.

We believe in inoculation, we favor the pure jelly medium, and we believe in STIMUGERM. Of all the inoculants manufactured we believe it is the most effective and cheapest, consistent with high quality. Farmers who have used it, will never again seed without it—even where the legumes have been grown before, because it is easier to make Better Best than Bad Good.

Full directions go with each bottle—easily applied—takes but a little time.

The organization which manufactured Farmogerm for ten years found it necessary to establish their own company, namely, Stimuplant Laboratories, Inc., and establish their own cultures of nitrogen-fixing bacteria for legumes, namely, Stimugerm. You will not suffer in any way from this change of brand name as you will be getting a product fully equal in quality to that which you have had before, manufactured under the same bacteriological supervision.

WHAT

STIMUGERM

LEGUME INOCULATION

WILL DO

STIMUGERM will reduce your fertilizer bills, give you larger crops, and improve your soil by producing nodules on the roots of legumes, as shown in the illustration above. No other inoculant is as strong and virile. No other inoculant will give the profusion of nodules.

When ordering, be sure to state what crops you wish to inoculate.

STIMUGERM is so inexpensive and is so effective an insurance that you cannot afford to sow legume crops without it.

ADVANTAGES OF USING EVER GREEN

1. **Sure Death** to all Common Insects. The U. S. Department of Agriculture has found the active principle of Ever Green to be effective against even the hard-to-kill Japanese beetles.

2. **Safety.** Ever Green is absolutely non-poisonous to man, birds, and animals. The person spraying cannot be injured. You need have no fear about children or pets being poisoned. If cattle, birds, poultry, or pets eat plants on which it has been sprayed, it will not injure them.

3. **Non-Injurious to Plants.** You can use Ever Green as strong and often as necessary. It will not damage the tenderest shoots or harm buds or blossoms.

4. **Appearance of Plants not Affected.** Ever Green will not "burn" the edges of delicate celery leaves. It does not lower the market value of crops.

5. **Does not Deteriorate.** Ever Green can be kept in the original package for years without loss of effectiveness.

6. **Kills both Chewing and Sucking Insects.** Ever Green is both a contact and stomach poison to insects.

7. **Easily Mixed.** Ever Green mixes readily with water or soapsuds. Simply pour it in and stir thoroughly.

8. **No Gumming of Sprayers.** Ever Green does not form a sediment—hence, it does not clog sprayers, nor does it have to be kept continually agitated.

9. **Does Not Act on Metal.** Ever Green will not corrode metal or rubber.

10. **Pleasant to Use.** Ever Green has a pleasant odor and being non-poisonous does not affect the person spraying.

STANLEY'S

CROW REPELLENT

Will absolutely prevent crows and other corn pulling birds and animal pests such as moles, woodchucks, squirrels, etc., from pulling corn.

Protect Your Seed Corn

During the period when it is most easily damaged, by ridding your crop of crows and other corn-pulling birds and animals. It saves

loss of seed and labor of replanting. It positively will not clog any planter. It is non-poisonous and will not injure the seed or any kind of corn. It is more effective, more convenient to use, and more economical than any other material.

LARGE CAN, \$1.50
(Enough for 2 bu. of seed corn)

SMALL CAN, \$1.00
(Enough for 1 bu. of seed corn)

BORDEAUX MIXTURE. Powder form. A quality product superior to the home-made Bordeaux mixture. Properly balanced in Copper Sulfate and lime content and having superior suspension, adhesive and spreading qualities. Recommended against Blotch, Cherry leaf Spot, celery blight, tomato leaf spot, blight and leaf hoppers on potatoes. 6 lbs. to 50 gals. equals 3-8-50. 8 lbs. to 50 gals. equals 4-4-50 mixture. Lb., 25c; 4 lbs., 80c.

CALCIUM ARSENATE. Powder form. A powerful poison for the bean beetle and other truck crops. Recommended for potatoes and tobacco. It is cheaper than Arsenate of Lead and 30% more effective. Can be used wet or dry. Use 2 lbs. to 50 gals. water, or 1 lb. to 9 lbs. Hydrated Lime. Lb., 20c; 4 lbs., 50c.

DRY LIME AND SULPHUR. A superior lime sulphur spray for the control of San Jose Scale, peach leaf curl, peach blight, apple and pear scab. Has all the effectiveness of liquid lime and sulphur and is much easier to handle. 1 lb. to 5 gals. water. 5 lbs., \$1.25; 10 lbs., \$2.30.

BOWKERS SPECIAL POWDER NO. 1. A fungicide and an insecticide combination. Recommended especially for potatoes and tobacco. Can be used wet. 6 lbs. to 50 gals. water or dry as needed. Lb., 18c; 4 lbs., 70c.

HAMMOND'S SLUG SHOT. Hammonds slug shot is used from ocean to ocean. A light composite fine powder, easily distributed either by dusters, bellows or with water by spraying. Thoroughly reliable in killing cut worms, potato bugs, cabbage worms, chicken lice, sow bugs, Mexican bean beetle and army worm. Lb., 20c; 5 lbs., 60c.

BLACK LEAF "40". For lice on plants. These destructive insects get on all kinds of plants, cabbage, potatoes, beets, radishes, turnips, lettuce, cucumbers, peas, etc. Black Leaf "40" is the one most effective spray. It kills these lice as soon as it touches them and does not harm vegetables and flower plants when used as directed. Recommended by Experiment Stations throughout the United States. As a spray for soft bodied sucking insects. May be combined with other sprays. Does not clog the nozzle.

1 oz. bottle, 35c, makes 5 to 10 gallons.

1/2 lb. can, \$1.25, makes 40 to 100 gallons.

2 lb. can, \$3.50, makes 300 to 500 gallons.

Cannot be sent by mail.

PYROX GIVES 53 BUSHELS OF POTATOES PER ACRE MORE THAN HOME-MADE BORDEAUX.

Mr. C. S. Ranck, New Holland, Pa., reports the following results of a test made on his farm:

"A two acre plot with uniform soil was selected and one-half was sprayed with Bordeaux mixture 8 times and the other half with PYROX 8 times. All other conditions—preparation, seed, time of planting and cultivation were the same.

"Potatoes from test rows in each plot were weighed at digging. The acre sprayed with Pyrox yielded 53 bushels more than where home-made Bordeaux was used, the yields on the two plots being 337 bushels for the Pyrox and 284 bushels for the Bordeaux Mixture."

SPRAY WITH PYROX

Kills bugs and checks blight—mixes easily, sticks like paint. Will not clog. GET BIGGER YIELDS.

Prices

ARSENATE OF LEAD (Powder Form). Superior to paste in that it does not deteriorate from standing. This is the best poison to use against worms and insects that eat leaves of plants, fruit trees, etc. The powdered form may be used either in water or dusted on the plants. In water use 1 lb. to 40 gallons. 1 lb., 30c; 4 lbs., \$1.00. **Not mailable.**

PESTROY. Sherman Williams Pestroy is a new development in the insecticide field. It is a combination of Arsenate of Lead and Bordeaux Mixture in dry powder form. When Bordeaux Mixture is combined with Arsenate of Lead the combination possesses insect killing qualities and the power to control Fungous diseases, while Bordeaux Mixture alone only has the power to control Fungous diseases and does not possess the insect killing qualities. In Pestroy you get both of these. It is in dry powder form and therefore produces a perfectly fresh mixture when prepared for use by the grower. Write for free leaflet. Lb., 40c; 4 lbs., \$1.20. **Not mailable.**

INCREASE YOUR MILK YIELD BY USING KOW-KARE

Kow-Kare works two ways to help you make more money from your cows. By building up and maintaining a health standard to throw off disease and endless worry. By aiding the organs of digestion to convert dry rich winter feeds into milk—without waste—it brings back your feed money via the milk pail plus a real profit.

USE KOW-KARE WHEN COWS FRESHEN

Many serious ills have their origin at calving time when the average cow is lowest in vitality and resistance. At no time can Kow-Kare help you more definitely than at this critical period. Large can, \$1.15; small can, 60c. Postage extra.

USE BAG BALM FOR COWS' UDDERS

Bag Balm insures quick healing for chaps, cracked or injured teats, inflammation, etc. Pleasant to use. 10 oz. package, 65c. Postage extra.

STIM-U-PLANT

THE MAGIC FERTILIZER IN TABLET FORM

GLORIOUS GARDENS PERFECT HOUSE PLANTS

STIM-U-PLANT is the only complete plant food in tablet form. Guaranteed analysis 11 per cent Nitrogen, 12 per cent Phosphoric Acid, 15 per cent Potash—all of which elements are water soluble and immediately available to the feeding root-hairs of the plant.

TABLET FORM OF GREAT VALUE

1. They give an EXACT FEEDING UNIT.
2. NO MESSY MIXING.
3. No UNPLEASANT ODOR.
4. MAXIMUM EFFICIENCY because no food-value lost in scattering, leaching, or run-off of soil surface-water.
5. Makes REPOTTING of plants UNNECESSARY as it replaces the food withdrawn by the growing plant.

EASY TO USE

Simply insert tablets in soil about 3 inches from stem of plant, or dissolve in water at the rate of four tablets to the gallon and apply as liquid manure. Complete directions with every package.

Order STIM-U-PLANT tablets with your seed and plant order. Price: 30 tablets 25 cts., 100 tablets 75 cts., 1000 tablets \$3.50 Postpaid

Conkey's Cholera Remedy

PRICES—25c and 50c, postpaid.

Conkey's Y-O

Yeast with Cod Liver Oil

A new Conkey product made to supply vitamins A, B and D which are essential to the life of poultry and live stock. The Conkey process seals the cod liver on the yeast so that the potency of the cod liver oil is preserved. Conkey's Y-O should be added to every feeding ration, whether for poultry or stock.

Poultry is especially benefited by Conkey's Y-O. Present extreme methods employed to increase egg production and force breeding stock robs poultry of vitamins which this product restores.

PRICES—5 lbs., \$2.00; 25 lbs., \$7.50. Postage or Express extra.

OYAMA PLANT FOOD

A WONDERFUL JAPANESE DISCOVERY

MAKES PLANTS THRIVE

By using OYAMA on house plants it will keep them in bloom all winter and as green and luxuriant as if grown outdoors in the summer. IT WILL MAKE YOUR FLOWER AND VEGETABLE GARDEN WONDERFULLY PRODUCTIVE and the envy of your neighbors.

It makes no difference how healthy or delicate your plants may be, OYAMA WILL BRING OUT NEW FLOWERS AND FOLIAGE and cause a marvelous transformation.

Where Our Seed Potatoes are Grown in Maine.

WE MAKE a specialty of handling large quantities of HIGH YIELDING STRAINS of Maine Grown Seed Potatoes. All our potatoes are raised from seed that has been certified as practically free from disease. The crops are inspected three times in the field, and if any plants appear weak or show any trace of disease they are at once dug out and removed off the field. The seed is therefore of the highest quality and produces the largest yields possible under favorable soil and weather conditions.

IT DOES NOT PAY to plant potatoes from a crop that was infested with the common diseases which often holds down the yields to a level that the results are actual losses instead of profit on the crop.
